Aerial imaging in one page: half the market sits with three software-led companies, the hardware layer is being reshaped by US regulation, and the report's roster has changed since it was written

Nine active competitors, assessed on twenty Ps at three levels, with dated developments to September 2026.

Top 3 share, 2025	Top 5 share	Hardware / software / services	Largest end use	Active competitors of 11 profiled	M&A events, May 2025 to Jul 2026	Largest deal	Report roster last updated
50%	70%	40 / 35 / 25%	Defence, 30%	9	4	USD 4.1 B (BlueHalo)	Feb 2025

1 Leadership is concentrated in revenue, dispersed in capability

Google, Hexagon AB and Nearmap hold 50%, but nine different companies lead the eight segments the report defines. No one leads more than three.

2 The winning model is imagery inside a workflow, not imagery alone

Procore buying DroneDeploy (USD 845 M), Nearmap buying itel, and Eagleview Horizon all sell the decision, not the picture. Standalone capture is becoming an input.

3 AI analytics is the contested layer

Three platform launches in twelve months (Google Earth AI, Eagleview Horizon, Octave as a separate company). This is where the next share shift will show first.

4 Regulation is now a competitive variable

The FCC Covered List (Dec 2025) stops new DJI models in the US; AeroVironment (post BlueHalo) and Airbus (Pleiades Neo Next, 2028) are positioned to gain in defence-adjacent capture.

5 Restate the roster before it goes to a client

PrecisionHawk ceased trading in Dec 2023 and Kespry has been part of Firmatek since 2021, yet both carry share in the report's Tier 2 and Tier 3. DroneDeploy will close into Procore in 2026.

6 Success factors, in order

1 AI analytics on imagery, 2 ownership of a vertical workflow, 3 supply that survives regulation, 4 data scale and recency, 5 capacity to buy or be bought.

HOW THIS DECK IS BUILT

Pages 2 to 4 show where the market is and who plays. Pages 5 to 7 rate every company on twenty Ps (who they are, what they sell, how they win); a cell reads n/a where no evidence exists. Page 8 turns the pattern into five success factors and a ranking. Pages 9 and 10 list what has actually happened and what each of your departments should do about it.

Sources: FMI Aerial Imaging Market Share Analysis (Feb 2025) for shares, tiers and segment leadership; company press releases and filings, regulator and court records, job boards and LinkedIn-derived headcount, company blogs and trade press, Dec 2023 to Sep 2026. Ownership, HQ and reach from public company information. Ratings, signals and actions are analyst reading.

Who leads which segment: nine companies lead eight segments, none leads more than three, and two of the report's listed players have already left the market

Share by player group and leadership by segment, 2025, with post-report status

Who holds the market, 2025

Top 3 50%	Rest of top 5 20%	Emerging 20%	Niche 10%
Google, Hexagon AB, Nearmap	DJI, EagleView Technologies	DroneDeploy, PrecisionHawk (exited), Airbus	AeroVironment, Kespry (exited), SimActive

Software and analytics · Hardware and platforms · Data and services · Aggregators and integrators

READING

Read across a row to see breadth; down a column to see contestability. Software and mapping have three leaders each and are where the share club competes; energy and disaster response are led by small specialists, one of which has exited, so those columns are open.

Sources: FMI Aerial Imaging Market Share Analysis (Feb 2025) for shares, tiers and segment leadership; company press releases and filings, regulator and court records, job boards and LinkedIn-derived headcount, company blogs and trade press, Dec 2023 to Sep 2026. Ownership, HQ and reach from public company information. Ratings, signals and actions are analyst reading.

Value in aerial imaging sits in the middle of the chain: hardware is 40% of spend but software and services, at 60% together, are where the share leaders play

How the market is organised from capture to end use, with the share of 2025 revenue at each stage and the companies that lead or are active there

Top 3 share, 2025	Top 5 share	Hardware	Software	Services
50%	70%	40% of market	35% of market	25% of market

1. Capture platforms

40% of market

Drones, satellites and aerial cameras; multispectral and LiDAR sensors.

LEADS

- **DJI (Tier 1)**
- **AeroVironment (Tier 3)**

ALSO ACTIVE

- PrecisionHawk
- Airbus

WHAT TO WATCH

Capture is the biggest slice of spend but is led by two platform makers, and US rules now cap what DJI can sell. Airbus and AeroVironment are the ones investing here.

2. Data capture and services

25% of market

Surveying, mapping and property assessment delivered as a service.

LEADS

- **EagleView Technologies**
- **DroneDeploy**

ALSO ACTIVE

- Nearmap
- Kespry

WHAT TO WATCH

Services firms bridge the chain: DroneDeploy and EagleView lead here and are active in software. This is the group every recent deal was in; DroneDeploy is now going into Procore.

3. Software and analytics

35% of market

AI image processing, photogrammetry, geospatial and cloud platforms.

LEADS

- **Hexagon AB**
- **Nearmap**

ALSO ACTIVE

- Google
- DroneDeploy
- EagleView Technologies
- SimActive

WHAT TO WATCH

Where the share leaders sit. Three AI platform launches in twelve months (Google, Eagleview, Octave). Whoever wins here decides what the imagery is worth.

4. End use

By application

Who buys the output and for what.

WHAT TO WATCH

Defence and mapping pay for the market, 55% together. Vendors are packaging imaging for one vertical at a time; energy and disaster response are led by small specialists.

ENABLERS AI object detection and predictive analytics | Cloud geospatial platforms | GIS and IoT integration for smart cities and energy

CONSTRAINTS GDPR and data privacy | FAA and airspace rules | Defence and export regulation

Source: Future Market Insights, Aerial Imaging Market report. Shares and company positions as stated in the report; stage boundaries are FMI's grouping.

Who plays in aerial imaging: eleven profiled companies across four business types, led by global software and platform firms; two of the eleven no longer compete independently

Player landscape by business type and geographic reach. Tier and share from the FMI report (2025); type, headquarters and reach from public company information.

	Software and analytics (3)	Hardware and platforms (3)	Data and services (2)	Aggregators and integrators (3)
Global (6) Sells in most major regions	1 **Hexagon AB (SE)** 2 DroneDeploy (US) *	1 **DJI (CN)** 2 Airbus (FR) 3 AeroVironment (US)		1 **Google (US)**
Regional (3) Strong in one or two regions			1 **Nearmap (AU)** 2 PrecisionHawk (US) *	2 EagleView Technologies (US)
Local or niche (2) One market or one specialist use	3 SimActive (CA)			3 Kespry (US) *

1 Tier 1, 50% combined share 2 Tier 2, 30% combined share 3 Tier 3, 20% combined share * no longer an independent competitor (see page 2)

SCALE Tier 1: 50% share, 4 companies | Tier 2: 30% share, 4 companies | Tier 3: 20% share, 3 companies

BY TYPE Software 3 | Hardware 3 | Data and services 2 | Aggregator 3 BY REACH Global 6 | Regional 3 | Local or niche 2

Software and analytics

HOW IT EARNS

Photogrammetry, AI image processing, geospatial and cloud platforms; licences and SaaS.

DOMINANT STRATEGY

Build AI reasoning on top of imagery; separate software from hardware businesses (Hexagon to Octave).

Hardware and platforms

HOW IT EARNS

Drones, UAV platforms, satellites and sensors; units, payloads and support contracts.

DOMINANT STRATEGY

Defend against regulation (DJI) or buy into defence and space (AeroVironment, Airbus).

Data and services

HOW IT EARNS

Capture imagery and deliver surveys, maps and property assessments; subscriptions and project fees.

DOMINANT STRATEGY

Acquire downstream claims and assessment capability to own the workflow (Nearmap).

Aggregators and integrators

HOW IT EARNS

Combine imagery with analytics into one offer for a vertical; platform access and solutions.

DOMINANT STRATEGY

Launch agentic AI products for insurance and property (EagleView); the smallest get absorbed (Kespry).

Sources: Future Market Insights, Aerial Imaging Market Share Analysis (tiers, shares, segment leadership). Player type, HQ and reach: public company information, to be confirmed by FMI analysts.

Corporate level: listed groups and PE-owned specialists compete with a private Chinese hardware leader; only three companies span more than two segments

Eight corporate Ps for the nine active competitors

LEVEL 1, CORPORATE: WHO THEY ARE

	Parent and ownership Public information: listed, private, PE-owned, or being acquired	Purpose (strategy) Dominant move evidenced by the latest dated event	Portfolio breadth Segments led or active in the report: 3 = four or more, 2 = two to three, 1 = one	Presence Reach: 3 global, 2 regional, 1 single market or niche	Power (scale) Report tier: Tier 1 = 3, Tier 2 = 2, Tier 3 = 1	Performance Financial signal in dated events (deal value, exit price, break-even). n/a where nothing	People Leadership or talent evidence. Not assessed in this pack	Partnerships Named alliances or channel partners in dated events
Google Tier 1 US	Listed (Alphabet)	Build AI platform	◑	●	●	n/a	n/a	◑ Vertex AI distribution
Hexagon AB Tier 1 SE	Listed; geospatial unit now Octave (listed May 2026)	Restructure and focus	◑	●	●	◑ Spin-off completed	n/a	n/a
Nearmap Tier 1 AU	Private (PE-owned)	Buy downstream (itel)	◑	◑	●	◔ Deal value undisclosed	n/a	◑ Esri ArcGIS content store
DJI Tier 1 CN	Private (China)	Defend market access	◔	●	●	n/a	n/a	n/a

DroneDeploy Tier 2 US	Being acquired by Procore (listed)	Exit to strategic	●	●	◑	● USD 845 M cash exit	n/a	● Procore platform
Airbus Tier 2 FR	Listed	Invest in capture assets	◑	●	◑	n/a	n/a	n/a
AeroVironment Tier 3 US	Listed	Buy into defence tech	◔	●	◔	● USD 4.1 B BlueHalo deal	n/a	n/a
SimActive Tier 3 CA	Private	Niche focus	◔	◔	◔	n/a	n/a	n/a

● Strong, direct evidence ◑ Moderate or partial ◔ Weak or indirect ○ None found n/a Not assessed

READING

Ownership splits the field into three: listed groups with capital (Google, Hexagon, Airbus, AeroVironment, soon Procore), PE-owned specialists that buy or build to exit (Nearmap, EagleView, DroneDeploy), and private hardware and niche firms. People and most Performance cells are n/a: financial and leadership data are not in the report and would need company accounts.

Sources: FMI Aerial Imaging Market Share Analysis (Feb 2025) for shares, tiers and segment leadership; company press releases and filings, regulator and court records, job boards and LinkedIn-derived headcount, company blogs and trade press, Dec 2023 to Sep 2026. Ownership, HQ and reach from public company information. Ratings, signals and actions are analyst reading.

Offering level: everyone now claims AI, but only four have a shipped analytics platform; pricing models split cleanly by business type

Six offering Ps for the nine active competitors

Future Market Insights Inc.

LEVEL 2, OFFERING: WHAT THEY SELL

	Product Segments led in the report: 3 = three, 2 = two, 1 = one	Platform (technology) Shipped AI or cloud analytics product with a dated launch: 3 = yes, 2 = announced or partial, 1 = capture only	Price and model Business model from company type: SaaS, licence, units, subscription, project	Positioning (verticals) Verticals named in report or events	Proof Named customer industries or references in dated events; n/a where nothing was found	Patents and IP Not assessed in this pack; needs patent database
Google Tier 1 US	◔	● Earth AI on Vertex AI, Oct 2025	Cloud usage	Defence data, general geospatial	n/a	n/a
Hexagon AB Tier 1 SE	◑	● Photogrammetry and AI surveying (Octave)	Licence and SaaS	Surveying, infrastructure, mapping	n/a	n/a
Nearmap Tier 1 AU	◑	◑ Property intelligence plus itel claims	Subscription	Insurance, urban planning	◑ Insurers via itel	n/a
DJI Tier 1 CN	◔	◔ Capture hardware; multispectral sensors	Units and payloads	Commercial and consumer capture	n/a	n/a
EagleView Technologies Tier 2 US	◑	● Eagleview Horizon, Apr 2026	Subscription and per-report	Insurance, roofing, government, solar, utilities	◑ Ten target industries named	n/a
DroneDeploy Tier 2 US	●	● AI drone surveying platform	SaaS	Construction, mapping, disaster	● 20 trillion sq ft of visual data (Procore)	n/a
Airbus Tier 2 FR	◔	◔ Satellite capture; 20 cm class from 2028	Imagery sales and defence contracts	Defence intelligence	n/a	n/a
AeroVironment Tier 3 US	◔	◔ UAV platforms; BlueHalo adds space and cyber	Units and defence programmes	Defence	n/a	n/a
SimActive Tier 3 CA	◔	◑ Photogrammetry software	Licence	Environmental and energy monitoring	n/a	n/a

● Strong, direct evidence ◑ Moderate or partial ◔ Weak or indirect ○ None found n/a Not assessed

READING

Product breadth and platform strength do not go together: DroneDeploy is the only company strong on both, which is why it fetched USD 845 M. Hardware players score 1 on platform by design; their route to the analytics layer is partnership or acquisition. Patents are not assessed; a patent pull would sharpen the Google, Hexagon and DJI cells.

Sources: FMI Aerial Imaging Market Share Analysis (Feb 2025) for shares, tiers and segment leadership; company press releases and filings, regulator and court records, job boards and LinkedIn-derived headcount, company blogs and trade press, Dec 2023 to Sep 2026. Ownership, HQ and reach from public company information. Ratings, signals and actions are analyst reading.

Execution level: momentum sits with the companies that shipped or transacted in the last 15 months; policy exposure divides hardware into losers and beneficiaries

Six execution Ps for the nine active competitors

LEVEL 3, EXECUTION: HOW THEY WIN

	Place (channel) Named distribution route: cloud marketplace, partner platform, direct or channel	Promotion (go-to-market) Not assessed beyond product launches; needs marketing and sales data	Pace (momentum) Dated event in the last 15 months: 3 = transaction or major launch, 2 = announcement, 1 = none found	Pipeline Stated roadmap or pending transaction	Policy exposure 3 = regulation works in its favour, 2 = neutral, 1 = regulation restricts it	Prospects Analyst view from the other 19 Ps: 3 gaining, 2 holding, 1 at risk
Google Tier 1 US	Vertex AI, Google Cloud	n/a	●	Geospatial reasoning agent rollout	◑	●
Hexagon AB Tier 1 SE	Direct and licence	n/a	●	Octave as independent company	◑	◑
Nearmap Tier 1 AU	Direct subscription; Esri content store	n/a	●	Integrate itel into claims workflow	◑	●
DJI Tier 1 CN	Retail and dealer channel	n/a	◑	Next-gen sensors; no US path for new models	◔	◔
EagleView Technologies Tier 2 US	Direct to insurers and contractors	n/a	●	Horizon rollout across ten industries	◑	●
DroneDeploy Tier 2 US	SaaS; Procore platform from 2026	n/a	●	Close into Procore, late 2026	◑	●
Airbus Tier 2 FR	Defence contracts; imagery distribution	n/a	◑	Pleiades Neo Next first launch, early 2028	●	◑
AeroVironment Tier 3 US	Defence programmes	n/a	●	Integrate BlueHalo; two operating segments	●	●
SimActive Tier 3 CA	Licence, direct	n/a	◔	n/a	◑	◑

● Strong, direct evidence ◑ Moderate or partial ◔ Weak or indirect ○ None found n/a Not assessed

READING

Six of nine companies transacted or shipped a major product in the window; only DJI and SimActive did not. Policy exposure is the sharpest divider: the same FCC action that restricts DJI benefits AeroVironment and Airbus. Promotion is n/a across the board; it needs data the report does not carry.

Sources: FMI Aerial Imaging Market Share Analysis (Feb 2025) for shares, tiers and segment leadership; company press releases and filings, regulator and court records, job boards and LinkedIn-derived headcount, company blogs and trade press, Dec 2023 to Sep 2026. Ownership, HQ and reach from public company information. Ratings, signals and actions are analyst reading.

What it takes to win: five success factors explain the leaders, and rank DroneDeploy, Google and Nearmap ahead of the incumbents on the report's own tiers

Success factors derived from where the segment leaders score high across the 20 Ps; weights are analyst judgement stated on the slide

	1. AI analytics on imagery **Weight 30%** Three platform launches in 12 months; the share club competes here, not in capture	2. Own a vertical workflow **Weight 25%** Every 2025-26 transaction bought a workflow: claims, construction, defence	3. Regulation-proof supply **Weight 15%** FCC listing removes a supplier from the US; buyers now price compliance	4. Data scale and recency **Weight 15%** Procore paid for 20 trillion sq ft; Nearmap and Eagleview sell recency	5. Capital to buy or be bought **Weight 15%** Four M&A events; standalone scale is hard to build organically	Composite weighted 0 to 3
DroneDeploy	●	●	●	●	●	3.0
EagleView Technologies	●	●	●	◑	◑	2.7
Hexagon AB	●	◑	●	◑	●	2.6
Nearmap	◑	●	●	●	◑	2.5
Google	●	◔	●	●	●	2.5
Airbus	◔	◑	●	◑	●	2.0
AeroVironment	◔	◑	●	◔	●	1.8
SimActive	◑	◔	●	◔	◔	1.6
DJI	◔	◔	◔	◑	◑	1.3

● Strong, direct evidence ◑ Moderate or partial ◔ Weak or indirect ○ None found n/a Not assessed

STRATEGIC GROUPS

Platform giants
Google, Hexagon AB (Octave)
Win on AI analytics and distribution; weak on owning a single vertical workflow.

Vertical integrators
DroneDeploy (Procore), Nearmap, EagleView
Win on workflow ownership and data recency; the group every 2025-26 deal was in.

Defence capture
Airbus, AeroVironment
Win on regulation-proof supply and capital; low on analytics.

Restricted hardware
DJI
Scale and product breadth, but US access closed to new models; prospects at risk.

Niche software
SimActive
Specialist photogrammetry; no recent event; holds a niche rather than contests a layer.

Sources: FMI Aerial Imaging Market Share Analysis (Feb 2025) for shares, tiers and segment leadership; company press releases and filings, regulator and court records, job boards and LinkedIn-derived headcount, company blogs and trade press, Dec 2023 to Sep 2026. Ownership, HQ and reach from public company information. Ratings, signals and actions are analyst reading.

What has actually happened: the twelve most recent developments, Oct 2025 to Sep 2026

Each row: what happened, when, the type, the department that produced it, the evidence and what it signals. Two exits (PrecisionHawk Dec 2023, Kespry 2021) are on page 2.

Future Market Insights Inc.

COMPANY	DEVELOPMENT (WHAT HAPPENED)	DATE	TYPE	SOURCE DEPT	EVIDENCE	SIGNAL (WHAT IT INDICATES)	WHO SHOULD ACT
DroneDeploy	Procore agrees to buy DroneDeploy for USD 845 million in cash; closing expected later in 2026. Procore cites DroneDeploy's 20 trillion sq ft of visual data.	**30 Jul 2026**	MA CP	Executive; Corporate development	**Trade press** Construction Dive, citing Procore announcement	Move along the chain: a construction platform absorbs an imagery vendor. Budget unlock at Procore for AI on jobsite data.	Sales: construction accounts will be sold imagery inside Procore. Corporate development: one fewer independent target.
DJI	Releases an independent security assessment while the Covered List challenge continues.	**28 May 2026**	MK LG	Legal and regulatory; Marketing	**Trade press** DroneLife	Trust campaign aimed at enterprise and public buyers; legal and marketing acting together.	Marketing: expect security claims in competitive deals. Legal and regulatory: monitor the Ninth Circuit outcome.
Hexagon AB	Octave, holding Hexagon's geospatial and infrastructure software, completes its spin-off and trades independently (named 17 Jun 2025).	**May 2026**	LD EX	Executive; Finance	**Press release / filing** Hexagon newsroom; Octave Form 10 information statement	Priority shift: geospatial software now has its own board, capital and targets.	Corporate development: new listed counterparty. Sales: account ownership at Hexagon and Octave has changed.
EagleView Technologies	Launches Eagleview Horizon, an agentic AI engine on aerial imagery, targeting ten industries from insurance to utilities.	**21 Apr 2026**	PR	Product and R&D; Marketing	**Press release / filing** Eagleview news announcement	Capability build: analytics layer on top of the imagery base; broadens from insurance into government, solar, telecom.	Product: benchmark agentic features. Marketing: ten named industries is a positioning map to answer.
DJI	Files a petition for review of the FCC Covered List decision, arguing the FCC exceeded its authority and breached procedure.	**20 Feb 2026**	LG	Legal and regulatory	**Regulator / court** US Court of Appeals, Ninth Circuit, via DroneLife	Defend: outcome uncertain for 12 to 24 months; existing US fleets keep operating, new models stay blocked.	Sales: US operators with DJI fleets face a replacement decision; open the conversation now. Legal: track the docket.
Nearmap	Nearmap imagery becomes purchasable inside ArcGIS Online through Content Store for ArcGIS.	**28 Jan 2026**	PT	Sales; Product and R&D	**Partner or customer** Esri ArcGIS Blog	Channel expansion: reaches every ArcGIS user without a direct sales touch.	Sales and partnerships: Esri marketplace is now a competitor channel; decide whether to list there too.
Airbus	First Pleiades Neo Next satellite scheduled for early 2028 on Vega C, with 20 cm class native resolution.	**27 Jan 2026**	PR CP	Product and R&D; Operations	**Press release / filing** Airbus newsroom	Capability build with a 2028 horizon; capital spending committed to capture, not analytics.	Product: plan for 20 cm satellite imagery as a 2028 baseline. Strategy: Airbus stays a capture supplier, not a platform rival.
DroneDeploy	Publishes a compliance guide for operators of foreign-made drones after the FCC action.	**Early 2026**	MK	Marketing	**Company blog / social** DroneDeploy blog: 'Foreign drones and the FCC Covered	Positioning: uses a rival's regulatory problem as a lead-generation topic aimed at compliance buyers.	Marketing: counter-content on compliance. Product: hardware-agnostic messaging matters.
DJI	FCC adds foreign-made drones and critical components to the Covered List; new DJI models cannot be authorised for the US.	**22 Dec 2025**	RG	Legal and regulatory; Sales	**Regulator / court** FCC Covered List update, via DroneLife	Risk: US supply of the hardware leader is capped at current models; buyers price compliance.	Sales: displacement opportunity in US public sector and utilities. Legal and regulatory: check own supply chain for covered components.
Google	Google Earth AI geospatial reasoning, a Gemini-powered agent, made available through Vertex AI on Google Cloud.	**23 Oct 2025**	PR PT	Product and R&D	**Company blog / social** Google Research blog	Platform capability with cloud distribution; analytics on imagery becomes a cloud service.	Product: assess Vertex AI as a build-on or a rival. Partnerships: Google Cloud channel.
Nearmap	17 open roles: VP Sales Government, Government solution PM (Carlsbad), Aerial Systems Engineer (Arlington VA), Enterprise AE Insurance, four claims-estimating roles (Jacksonville). No AI or ML	**Sep 2026**	HR	Sales; Product and R&D; HR and talent	**Job board** Glassdoor: 17 open roles	Priority shift: building a US government line of business and integrating itel claims work; analytics hiring absent.	Sales: expect Nearmap in US federal and state bids. HR: they are recruiting government sellers in Utah and Virginia.
DroneDeploy	Headcount 232, up 7.2% year on year; sales is the largest function at 32, ahead of engineering at 30 and marketing at 11 (LinkedIn-derived).	**Sep 2026**	HR	Sales; HR and talent	**LinkedIn headcount** Unify (LinkedIn-derived): 232 employees, +7.2% year on	Sales-led growth ahead of the exit; a lean marketing team suggests channel and product-led acquisition.	Sales: 32 sellers is the size of the competing field team. HR: benchmark sales-to-engineering ratio.

WHAT IT MEANS FOR EACH OF YOUR DEPARTMENTS

Sales

Three displacement pools: US operators with DJI fleets, former PrecisionHawk accounts, construction accounts moving to Procore. Expect Nearmap in US government bids and inside ArcGIS.

Marketing

Competitors are using regulation as content (DroneDeploy) and security assessments as trust signals (DJI). Eagleview named ten industries; answer that map.

Product and R&D

Three analytics platforms shipped in twelve months. 20 cm satellite imagery arrives in 2028. Claims and compliance features are becoming standard.

Corporate development

Four transactions in 15 months, all buying a workflow or a defence capability. Octave and Procore are new counterparties; the independent target list is shorter.

HR and talent

Nearmap is hiring government sellers in Utah and Virginia with no AI roles; DroneDeploy runs 32 sellers against 30 engineers. Benchmark your own mix.

Legal and regulatory

The FCC Covered List and DJI's Ninth Circuit petition set a 12 to 24 month uncertainty window; audit supply chains for covered components.

Sources: FMI Aerial Imaging Market Share Analysis (Feb 2025) for shares, tiers and segment leadership; company press releases and filings, regulator and court records, job boards and LinkedIn-derived headcount, company blogs and trade press, Dec 2023 to Sep 2026.
