Executive Summary

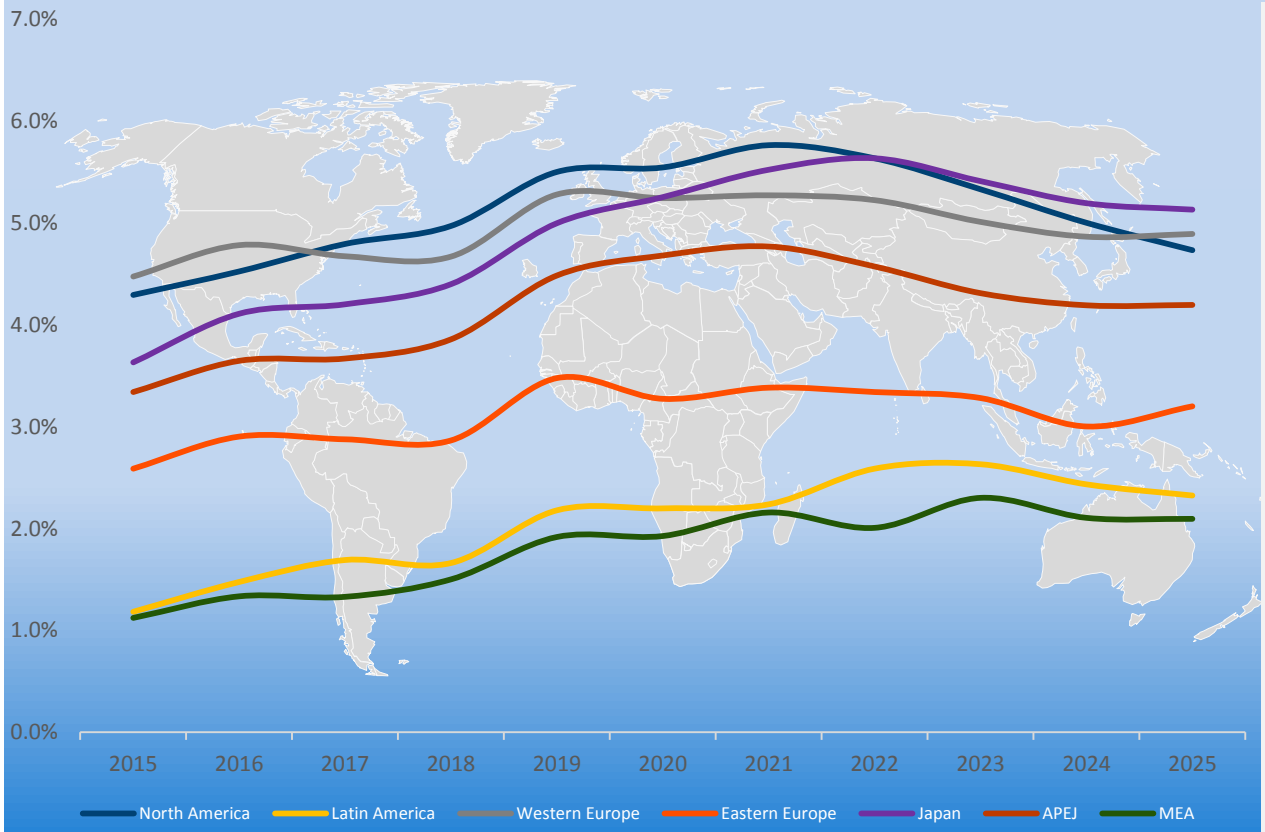

©2015 Future Market Insights, All Rights Reserved

Executive Summary (1/2)

Increasing cutting-edge product innovation globally along with rising wound prevalence is expected to boost overall growth of the digital wound measurement devices market in the near future

Global demand for digital wound measurement devices is expected to gain momentum in emerging markets by the mid of the forecast period, 2015–2025

Source: *FMI, 2015*

Foreword

- Global demand for digital wound measurement (DWM) devices is increasing as a result of rapid adoption of new technologies and increasing wound incidence. FMI presents in-depth analysis on the outlook of the digital wound measurement devices market for forecast period, 2014–2025.
- Developed economies are witnessing rapid shift in demand from conventional wound measurement devices to digital wound measurement devices. DWM devices adoption is projected to increase at a rate of 4.7% throughout the forecast period.
- Globally, increasing geriatrics population along with product innovation is expected to create favourable market prospects for DWM devices manufacturers.

©2015 Future Market Insights, All Rights Reserved

Executive Summary (2/2)

Global digital wound measurement devices is expected to witness 1.6X increase in revenue generated by 2025 end

Overview

- *Global digital wound measurement devices market accounted for US$1.5 Mn in 2014, which is expected to increase to US$ 2.5 Mn in 2025 at a CAGR of 4.7%*
- *The global DWM devices market has been analyzed on the basis of wound type and end users across the globe*

Drivers

- *Increase in prevalence of chronic diseases resulting in wound incidence*
- *Ageing population*
- *Product innovation*

Challenge

- *High cost of latest Technologies*
- *Lack of skilled professionals*

Competitive Landscape

Section 02

Research Methodologies

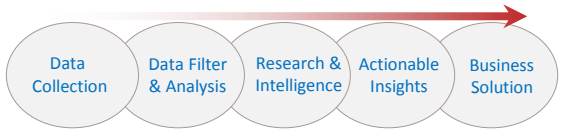

©2015 Future Market Insights, All Rights Reserved

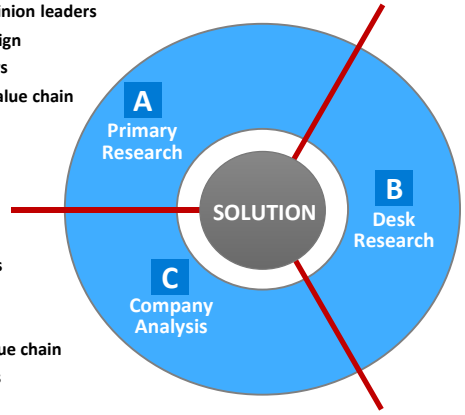

Research Methodology (1/2)

SYSTEMATIC RESEARCH APPROACH

1 Market profiling	In-depth secondary research is used to ascertain overall market size, top industry players, top products, industry associations, etc.
2 Formulating discussion guide	FMI formulates a detailed discussion guide to conduct expert and industry interviews
3 Developing list of respondents	FMI develops a list of industry players (manufacturers), distributors, retailers, and industry experts
4 Data collection	FMI conducts interviews with industry experts, industry players, distributors, and retailers
5 Data validation	Data is validated by triangulation method, wherein secondary, primary, and FMI analysis contribute to the final data
6 Data analysis	Data is scrutinized using MS-Excel to obtain qualitative and quantitative insights about the industry
7 Insights	FMI delivers industry insights and information in the required format (PDF)

- Identifying key opinion leaders
- Questionnaire design
- In-depth interviews
- Coverage across value chain

- Key industry experts
- Channel study
- Developments
- Market dynamics
- Products
- Conclusions

- Market participants
- Key strengths
- Product portfolio
- Mapping as per value chain
- Key focus segments

Primary Research #	Secondary Research #	Paid Publications#
Linkedin	Company websites	Factiva
Zoominfo	Company annual reports	GBI
Salesforce	White papers	Genios
Avention	Financial reports	Meltwater

©2015 Future Market Insights, All Rights Reserved

Research Methodology (2/2)

Secondary Research

- DWM devices market trends and forecast
- DWM devices market historical trends
- DWM devices market region-wise trends
- DWM devices market growth projections

Primary Research

- Major drivers, restraints and opportunities in global DWM devices market
- Key challenges faced by manufacturers and suppliers
- Market segmentation on the basis of regions and wound type
- Regional value split
- Average cost of DWM devices
- Market scenario of DWM devices
- Present and future market value potential
- Anticipated growth projections
- Market concentrations
- Major trends

Data Analysis

- Average use of global DWM devices
- Historical trend analysis
- Statistical analysis

- Region-wise DWM devices market was analysed to arrive at global market value
- CAGR and Y-o-Y growth rate used to arrive at global market value

Key Sources Referred

- Industry association publications
- Annual reports, publications, presentations, World Bank, IMF, EPA government websites
- Medical Journals, Clinical Studies

Key Sources

- Industry experts
- Manufacturers
- Suppliers

Data Reporting

- Qualitative data and facts
- Quantitative data
- Market dynamics

Section 03

Assumptions & Acronyms

©2015 Future Market Insights, All Rights Reserved

Assumptions and Acronyms

Assumptions

- **Market & Forecast :**
  - Yearly change in inflation rate has not been considered while forecasting market numbers
  - Bottom-up approach has been used to assess market numbers for each product category
  - Top-down approach has been used to counter-validate the reached numbers and end-use application-wise market numbers
  - Product wise Weighted Average Selling Price has been considered to deduce market values
  - Macro-economic indicators such as GDP, healthcare spending, end-use business scenario, merchandise trade, and prices have been considered to arrive at the indicated market numbers
  - Secondary axis represents Y-o-Y growth
- **Currency :**
  - All the indicated denominations are in US$ (US Dollar)
- **Source :**
  - Company Annual & financial reports, paid sources

Terminology Used

Absolute $ Opportunity	Increment in total market revenue within consecutive years
Market Attractiveness	Assessment metrics based on incremental growth and CAGR of the target segment/market

Acronyms Used

CAGR	Compound Annual Growth Rate
Y-o-Y	Year-on-Year
Mn	Million
BPS	Base Point Share
MEA	The Middle East & Africa
APEJ	Asia Pacific Excluding Japan
RoW	Rest of the World
DWM	Digital wound measurement devices
ASP	Average Selling Price
‘000	Thousand
Bn	Billion

What Makes Digital Wound Measurement Devices Market Attractive

©2015 Future Market Insights, All Rights Reserved

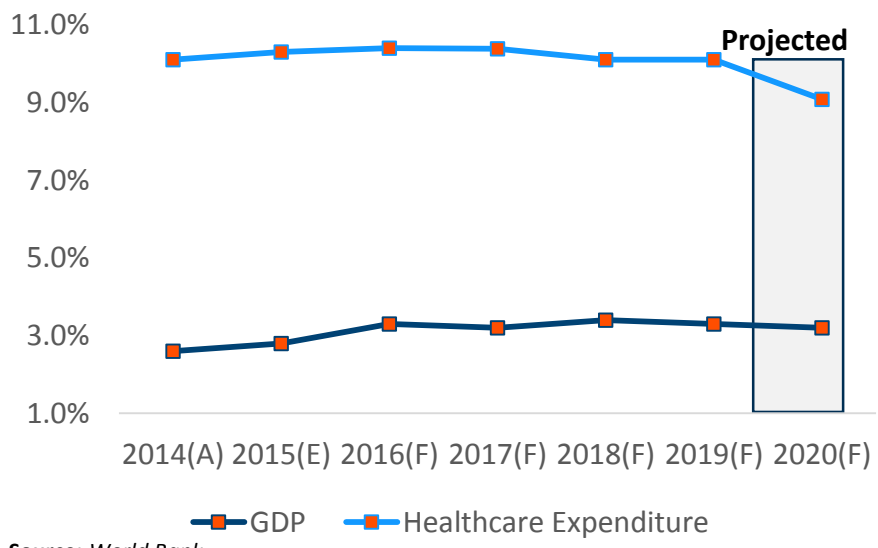

What Makes Digital Wound Measurement Devices Market Attractive (1/3)

Figure 01: Global Wound Prevalence By Etiology

Source: *FMI, 2015*

Figure 02: Global GDP Vs. Healthcare Expenditure Prevalence

Source: *World Bank*

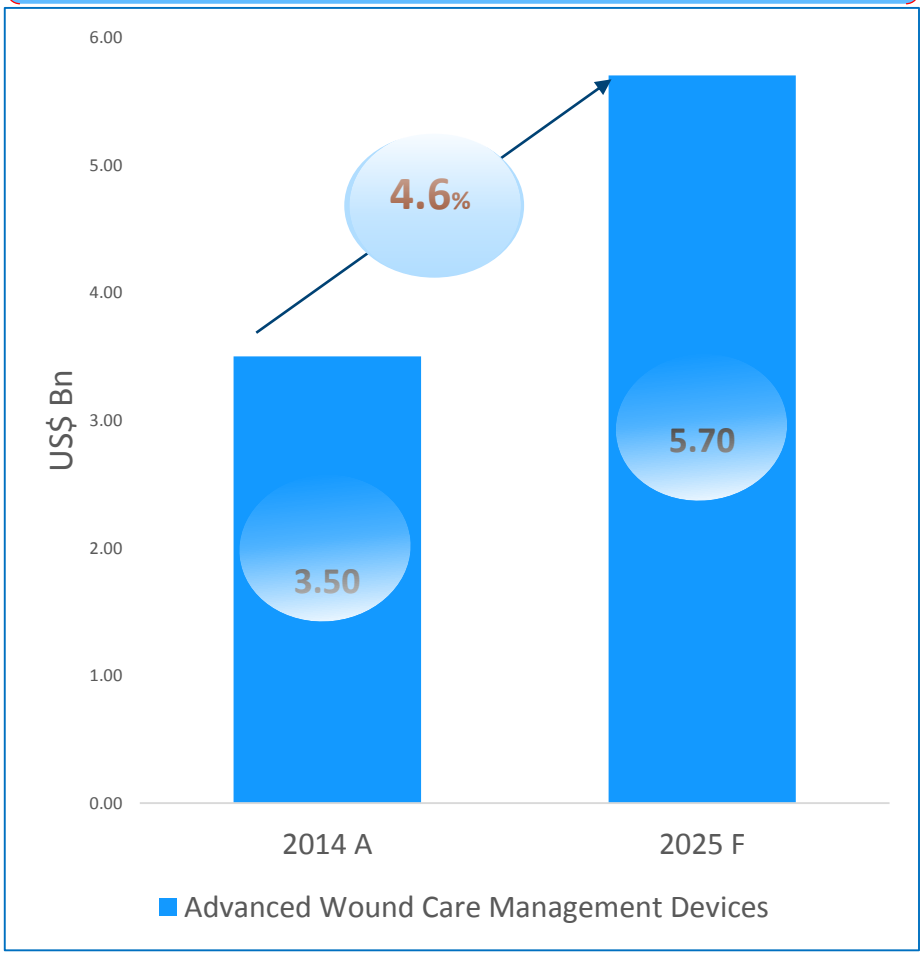

- Among wound types, incisional wounds are widely prevalent globally; however, wound measurement device are primarily used for diabetes-related ulcers, followed by other chronic wounds.
  - Diabetic ulcers is expected to witness highest growth rate of 10.3% during the forecast period, thus creating lucrative opportunities for digital wound measurement devices manufacturers in the near future.

- Increasing urbanisation coupled with surge in healthcare spending has led to greater awareness of the potential benefits of wound measurement devices among healthcare practitioners
  - The U.S., followed by European countries are witnessing major transition in healthcare system. Advancements in healthcare technologies is expected to create substantially potential market prospects for digital wound measurement devices over the forecast period.

What Makes Digital Wound Measurement Devices Market Attractive (2/3)

Figure 03: Global Wound Care Management Market

- Global wound care management market is expected to witness 1.2X increase in its revenue by 2025 end. Global demand for wound care management devices is expected to create favorable climate for sales of digital wound measurement devices in the coming years.

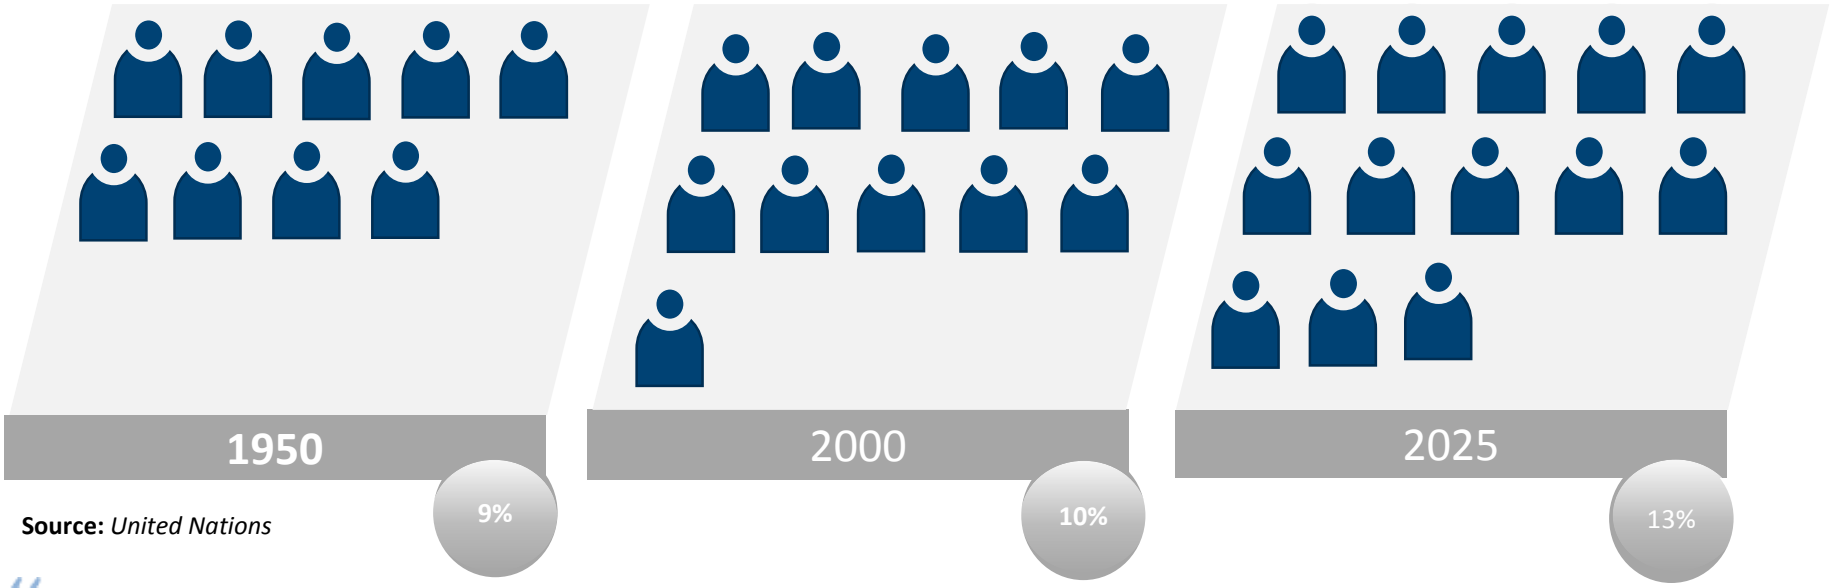

- On an average, 10 to 20 out of 1,000 persons sustain injuries or cuts each year, of which few opt for medication/treatment
  - Incidence rate of wounds is predominantly lower in developed economies. For instance, wound incidence rate is around four out of every 1,000 persons in developed regions.
  - Increasing healthcare awareness is expected to boost demand for advanced wound management devices over the next few years

Source: *FMI, 2015*

©2015 Future Market Insights, All Rights Reserved

What Makes Digital Wound Measurement Devices Market Attractive (3/3)

Figure 04: Global Geriatrics Population Proportion

Source: *United Nations*

Ageing population is more susceptible to wounds and cuts. Growing geriatrics population is expected to fuel growth of the wound care market over the forecast period. Well-planned marketing strategies along with partnerships with local distributors could help digital wound measurement devices manufacturers to capitalize on untapped markets in emerging regions such as Asia Pacific and the Middle East, where geriatrics population is significantly higher compared to developed regions

Section 05

Global Digital Wound Measurement Devices Market Taxonomy

©2015 Future Market Insights, All Rights Reserved

Digital Wound Measurement Devices Market Introduction: Definition (1/2)

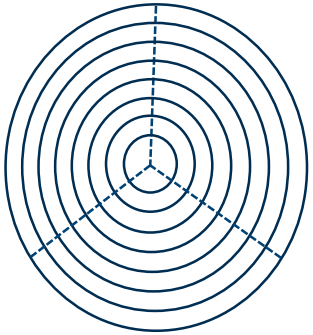

"Digital wound measurement device is 3D-enabled to measure wound dimensions (area, length, width and depth) and produce a visible record of these dimensions.
These devices converts line tracing into true area measurement, and are used to calculate change in area of wounds over the course of healing. One unit refers to one DWM device"

Global Digital Wound Measurement Devices - Overview

Digital wound measurement devices market is projected to register 1.6X increase in its revenue by the end of forecast period, 2025

Figure 05: Global Digital Wound Measurement Devices Market Value Forecast (US$ Mn), 2014–2025

Source: *FMI, 2015*

Market Outlook

- Figure 05 highlights overall value of the digital wound measurement devices market from 2014 to 2025
  - Global digital wound measurement devices market is expected to be valued at US$ 2.5 Mn by 2025 end
  - It is projected to create overall incremental opportunity of US$ 1 Mn from 2014 to 2025
    - *Technological innovations in medical devices along with growing healthcare concerns worldwide is fuelling demand for technologically advanced digital wound measurement devices*
    - *Increasing wound incidence among geriatrics population is also acting as a key driver for overall growth of the digital wound measurement devices market*

Market Dynamics

©2015 Future Market Insights, All Rights Reserved

Digital Wound Measurement Devices Market: Drivers and Restraints

©2015 Future Market Insights, All Rights Reserved

Digital Wound Measurement Devices Market: Drivers

Healthcare reforms, increasing geriatrics population and product innovations are expected to boost overall sales revenue of digital wound measurement devices

Increasing Prevalence of Chronic Diseases

- Increasing prevalence of chronic disease also drives incidence of associated wounds. This, in turn has led to a surge in demand for efficient wound care services, including use of DWM devices in recent years. Moreover, healthcare professionals, especially in developed regions, are increasingly inclined towards adoption of DWM devices to track healing progress of major wounds.
  - *For instance, chronic diseases are projected to account for almost three-quarter of deaths worldwide by 2020. Furthermore, 70% of total deaths occurring due to diabetes globally is projected to reported from developing countries.*

Increasing Ageing Population

- Increasing ageing population across the globe is expected to drive demand for digital wound measurement devices
  - *Global ageing population is increasing rapidly. Between 2000 and 2050, the geriatrics population is expected to account for 11% to 22% of the overall population, growing from 605 million to 2 billion over the same period*

Product Innovation

- The global digital wound measurement devices market is dominated by only two key players. Hence, new entrants as well the existing players are focused towards introducing innovate products to capture market share.

©2015 Future Market Insights, All Rights Reserved

Digital Wound Measurement Devices Market: Restraints

Preference for low cost alternatives such as traditional wound measurement devices is a key factor affecting rapid adoption of digital wound measurement devices

High Costs of Latest Technologically Advanced Devices

- High costs of latest technologically advanced DWM devices is a major barrier for growth of the global digital wound measurement devices market. Healthcare professionals, especially in developing regions, prefer traditional devices such as rulers or tapes for measuring wounds, as these are available at a fraction of the cost of advanced digital wound measurement devices. This is a major restraint for growth of the market.

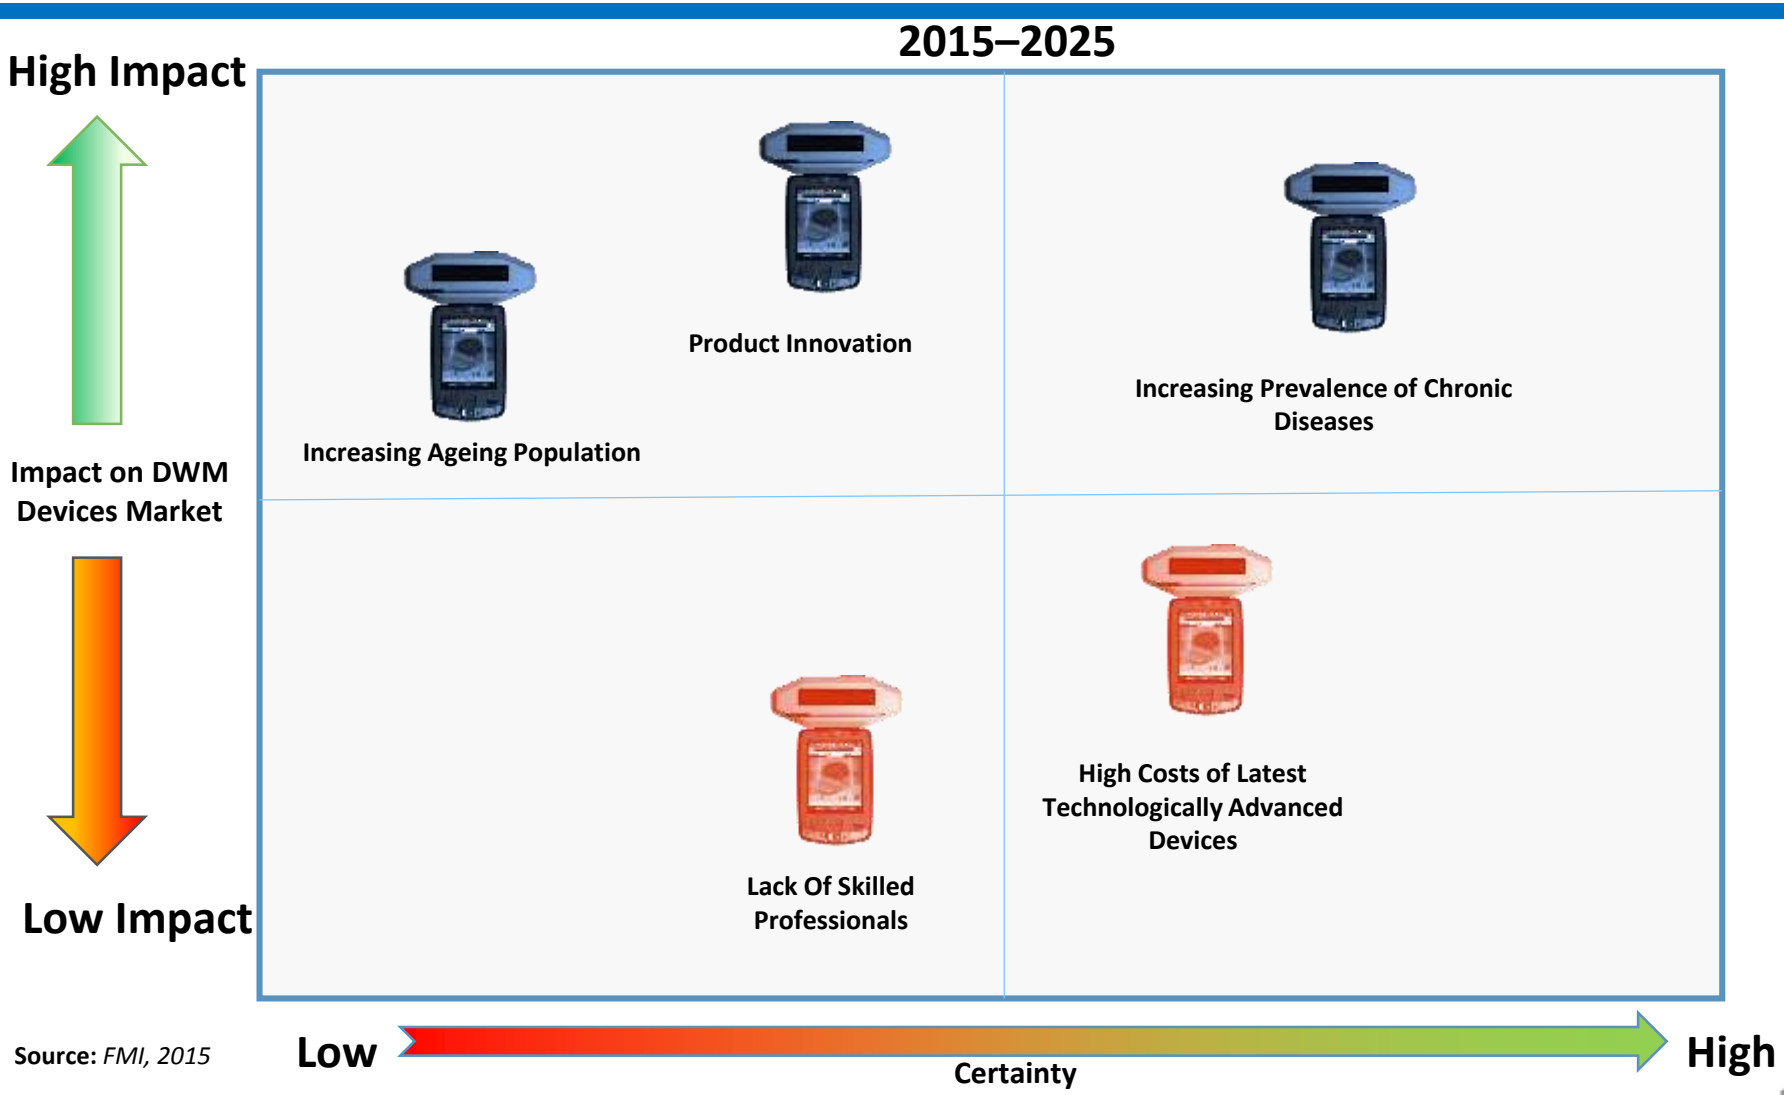

Lack Of Skilled Professionals

- Lack of awareness about DWM devices and paucity of trained professionals to operate these devices is affecting market growth to a certain extent

©2015 Future Market Insights, All Rights Reserved

Market Dynamics Impact Analysis

Increase in ageing population along with innovation in healthcare devices and equipment is expected to boost demand for DWM devices in the near future

Source: *FMI, 2015*

Digital Wounds Measurement Devices Market: Trends

	Trends	Description
	Switching from Traditional Devices to Digital Devices	*Players in this market are continuously developing and introducing newer and advanced medical devices and products through technological innovation, to cater to steadily increasing shift from traditional wound measurement devices to newer and more advanced options*
	Increasing Healthcare Expenditure in Asia Pacific Region	*Healthcare expenditure in Asia pacific is increasing rapidly owing to involvement of private as well as public companies. Also, urban planning to achieve sustainable and healthy communities is a concern for governments across the region.*
	Extensive Research and Development	*Manufacturers of DWM devices are constantly investing in research and development activities to design, develop and introduce technologically advanced products and to upgrade their existing product portfolios*

Source: *FMI, 2015*

Market Outlook

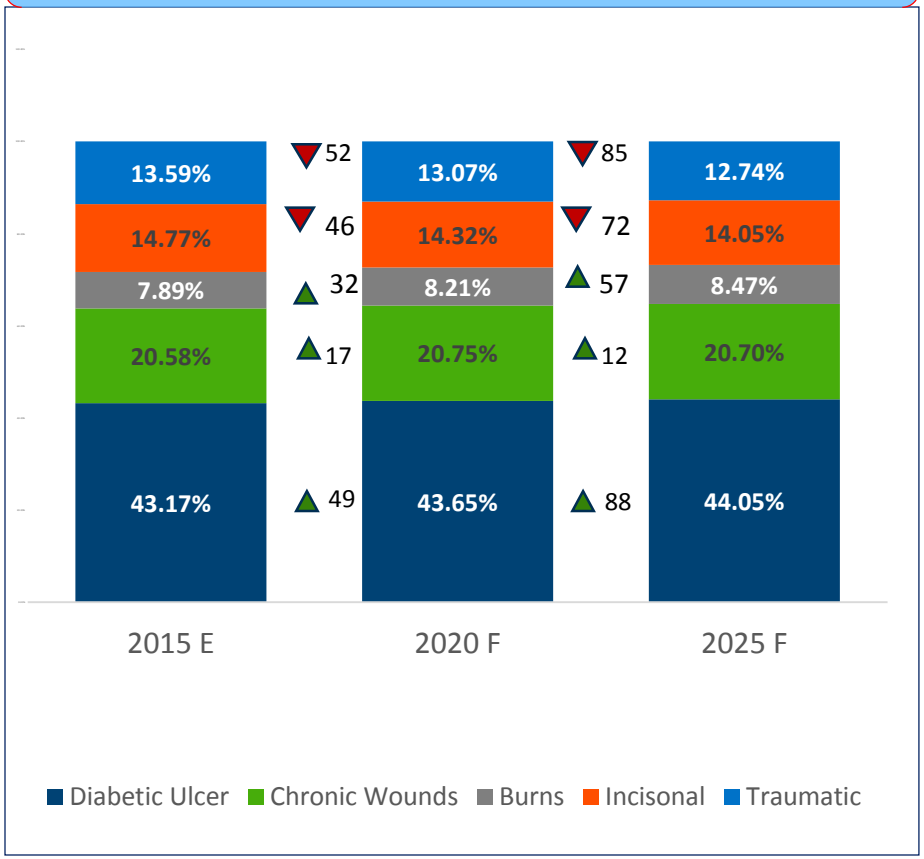

- Figure 06 highlights Y-o-Y growth for global digital wound measurement devices market by wound type
  - Diabetic ulcer segment is projected to exhibit an average Y-o-Y growth rate of 4.8 % between 2014 and 2020
    - *Increasing health complications due to widespread prevalence of diabetes leads to diabetic ulcers. This is the prime factor driving demand for digital wound measurement devices across the globe.*
  - Chronic wounds such as pressure ulcers, arterial ulcers and venous stasis ulcers are projected to increase in coming years due to sedentary lifestyles
    - *Expected decline in arterial wound cases is projected to lead to decline in Y-o-Y rate of chronic wounds segment from 4.0% in 2015 to 3.5% in 2016*

Global Digital Wound Measurement Devices Market Revenue Proportion By Wound Type

Among DWM devices by wound type, burns segment is expected to witness highest CAGR of 5.5% over the forecast period

Figure 07: Global DWM Devices Market Value Share By Wound Type, 2015–2025 (%)

Source: *FMI, 2015*

Market Outlook

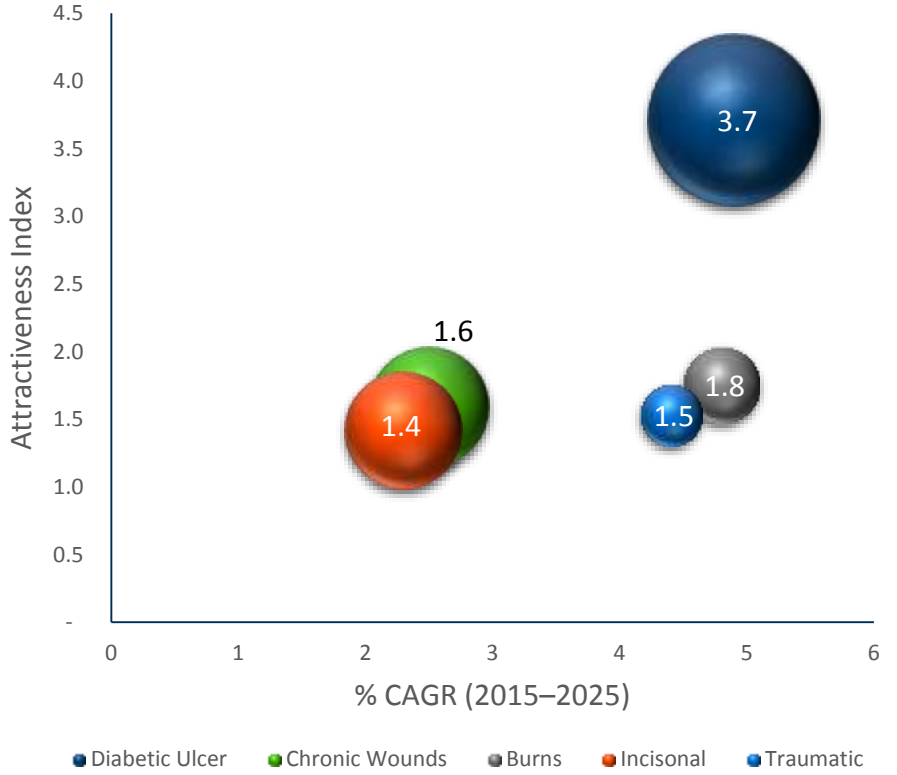

- Figure 07 highlights global digital wound measurement devices market revenue proportion by wound type, for 2015, 2020 & 2025
  - In terms of value share by wound type, the diabetic ulcers segment is expected to dominate the market, gaining 49 BPS and accounting for 44.1% share over the forecast period
  - The incisional wounds segment is expected to lose 72 BPS over the forecast period to account for 14.1% share by 2025

©2015 Future Market Insights, All Rights Reserved

Global Digital Wound Measurement Devices Market Attractiveness Index By Wound Type

Diabetic ulcers followed by chronic wounds are expected to be the two most attractive wound type segments in the global DWM devices market in terms of value over the forecast period

Figure 08: Global DWM Devices Market Value Attractiveness By Wound Type, 2015–2025

Source: *FMI, 2015*

Market Outlook

- Figure 08 represents attractiveness index of the global digital wound measurement devices market on the basis of wound type
  - Diabetic ulcer and burns are expected to be the two most attractive wound type segments, exhibiting an attractiveness index of 3.7 and 1.8 respectively
  - Although prevalence of incisional wounds is higher than that of other wound types, very few cases registered require medication/treatment. Thus, the segment is expected to be a less attractive as compared to diabetic ulcers and chronic wounds segments over the forecast period.

Global DWM Devices Market Analysis for Diabetic Ulcer Wound Type

Diabetic ulcer wound type segment is projected to increase 1.7X by the end of 2025 as compared to that in 2014

Figure 09: Global DWM Devices Market Value (US$ '000) & Y-o-Y Growth (%) for Diabetic Ulcer Wound Type, 2014–2025

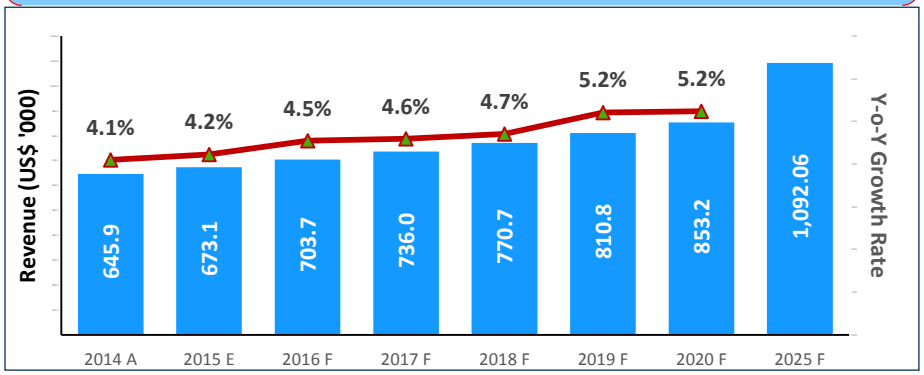

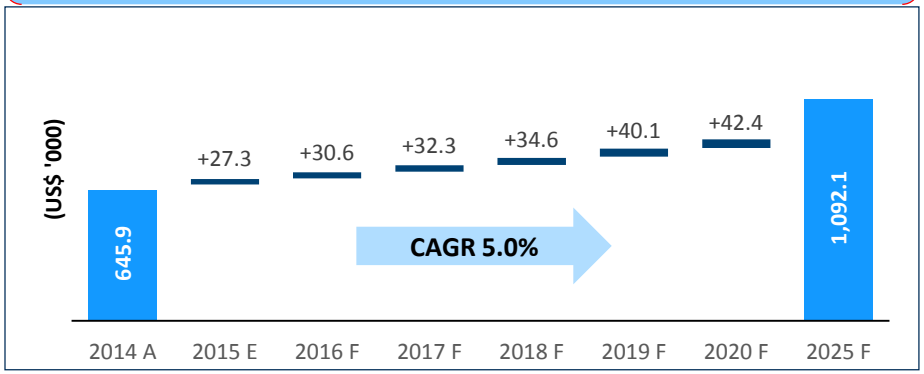

Figure 10: Global DWM Devices Market Absolute $ Opportunity (US$ '000) for Diabetic Ulcer Wound Type, 2014–2025

Source: *FMI, 2015*

Market Outlook

- Figures 09 and 10 highlight diabetic ulcer segment revenue contribution and overall incremental opportunity from 2014 to 2025
  - *In 2014, diabetic ulcer segment was the most dominating segment in the DWM devices market, accounting for around 54% share or US$ 645.9 thousand*
  - *The diabetic ulcer segment is expected to account for US$ 1,092.1 thousand by 2025 at a CAGR of 5% over the forecast period*
  - *This segment is expected to create an incremental opportunity of US$ 446.2 thousand for the overall DWM devices market from 2014 to 2025*
  - *Absolute $ value for 2015 is estimated to be US$ 27.3 thousand.*

Global DWM Devices Market Analysis for Chronic Wound Type

By 2025, chronic wounds segment is anticipated to witness an increase of 1.7X in terms of value as compared to 2014

Figure 11: Global DWM Devices Market Value (US$ '000) & Y-o-Y Growth (%) for Chronic Wound Type, 2014–2025

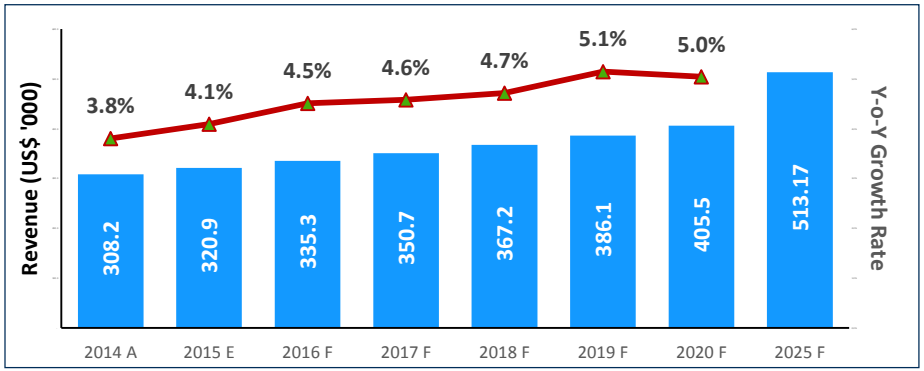

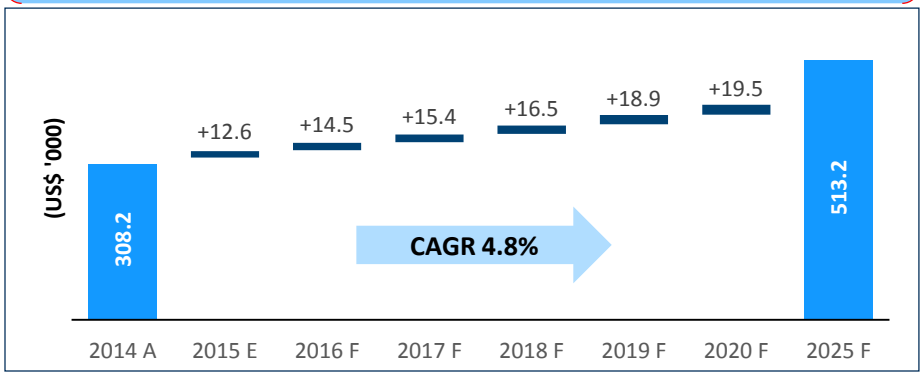

Figure 12: Global DWM Devices Market Absolute $ Opportunity (US$ '000) for Chronic Wound Type, 2014–2025

Source: *FMI, 2015*

Market Outlook

- Figures 11 and 12 highlight chronic wounds segment revenue contribution and overall incremental opportunity from 2014 to 2025
  - *In 2014, the chronic wounds segment was valued at US$ 308.2 thousand, which is estimated to increase to US$ 320.9 thousand by 2015 end, reflecting a Y-o-Y growth rate of 4.1%*
  - *The chronic wounds segment is expected to account for US$ 513.1 thousand by 2025 at a CAGR of 4.8% over the forecast period*
  - *This segment is expected to create incremental opportunity of US$ 204 thousand for the overall digital wound measurement devices market from 2014 to 2025*
  - *Absolute $ value for 2015 is estimated to be US$ 12.6 thousand.*

Global DWM Devices Market Analysis By Burns Wound Type

By 2025, burns segment is anticipated to witness an increase of 1.8X in terms of value as compared to 2014

Figure 13: Global DWM Devices Market Value (US$ '000) & Y-o-Y Growth (%) By Burns Wound Type, 2014–2025

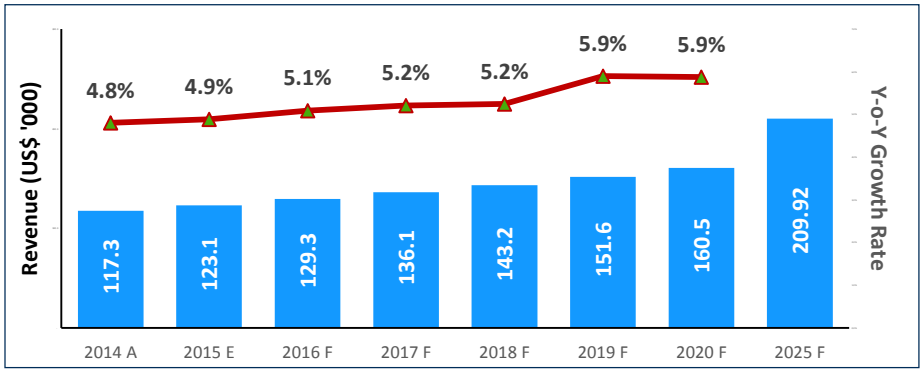

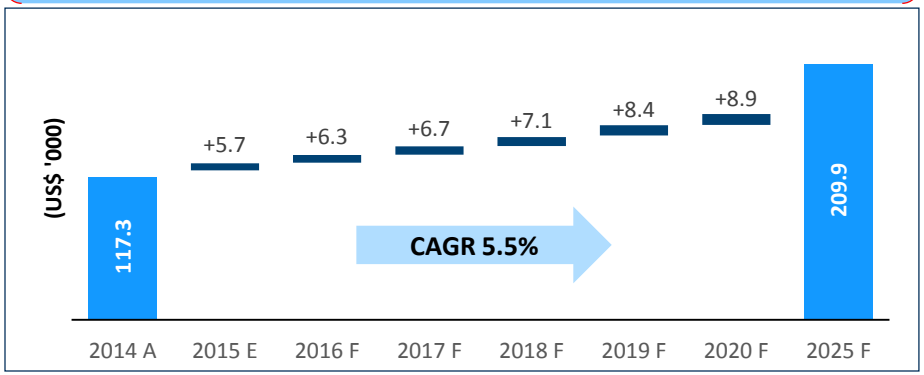

Figure 14: Global DWM Devices Market Absolute $ Opportunity (US$ '000) By Burns Wound Type, 2014–2025

Source: *FMI, 2015*

Market Outlook

- Figures 13 and 14 highlight burns segment revenue contribution and overall incremental opportunity from 2014 to 2025
  - *In 2014, burns segment was valued at US$ 117.3 thousand and is estimated to account for US$ 123.1 thousand by the end of 2015, reflecting a Y-o-Y growth rate of 4.9 %*
  - *This segment is expected to account for US$ 209.9 thousand by 2025 at a CAGR of 5.5% over the forecast period*
  - *The segment is expected to create incremental opportunity of US$ 92.5 thousand for the overall DWM devices market from 2014 to 2025*
  - *Absolute $ value for 2015 is estimated to be US$ 5.7 thousand.*

Global DWM Devices Market Analysis By Incisional Wound Type

By 2025, incisional wounds segment is anticipated to witness an increase of 1.6X in terms of value as compared to 2014

Figure 15: Global DWM Devices Market Value (US$ '000) & Y-o-Y Growth (%) By Incisional Wound Type, 2014–2025

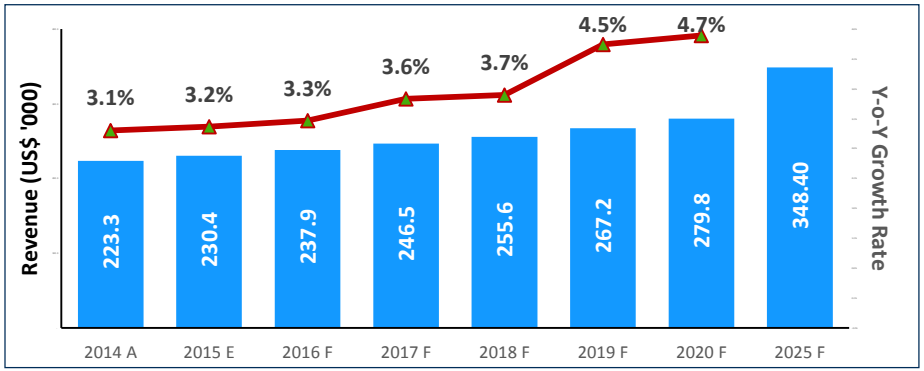

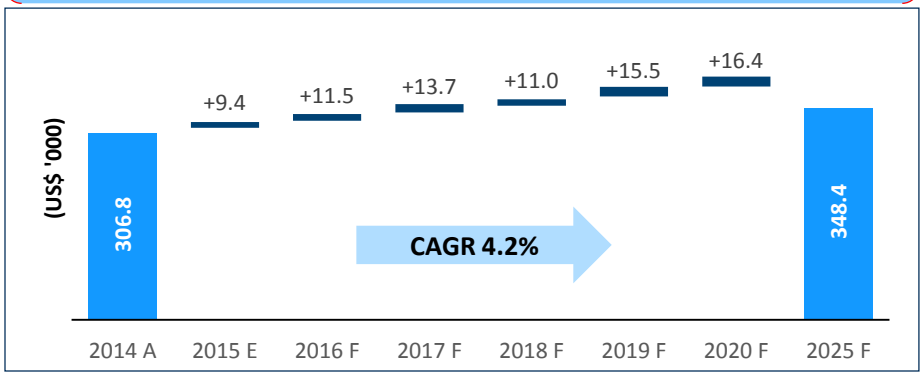

Figure 16: Global DWM Devices Market Absolute $ Opportunity (US$ '000) By Incisional Wound Type, 2014–2025

Source: *FMI, 2015*

Market Outlook

- Figures 15 and 16 highlight incisional wounds segment revenue contribution and overall incremental opportunity from 2015 to 2025
  - *In 2014, incisional wounds segment was valued at US$ 223.3 thousand and is estimated to account for US$ 230.4 thousand by 2015 end, reflecting a Y-o-Y growth rate of 3.2%*
  - *This segment is expected to create incremental opportunity of US$ 125.1 thousand for the overall DWM devices market between 2014 and 2025*
  - *Absolute $ value for 2015 is estimated to be US$ 9.4 thousand.*

©2015 Future Market Insights, All Rights Reserved

Global DWM Devices Market Analysis for Traumatic Wound Type

by 2025, traumatic wounds segment is anticipated to witness an increase of 1.8X in value as compared to 2014

Figure 17: Global DWM Devices Market Value (US$ '000) & Y-o-Y Growth (%) By Incisional Wound Type, 2014–2025

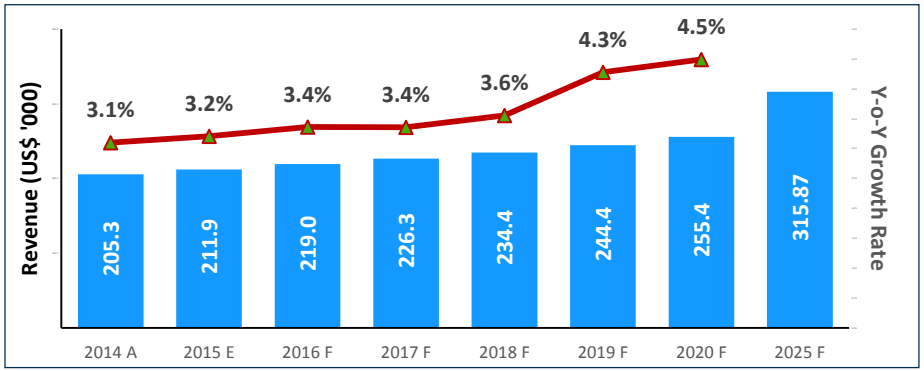

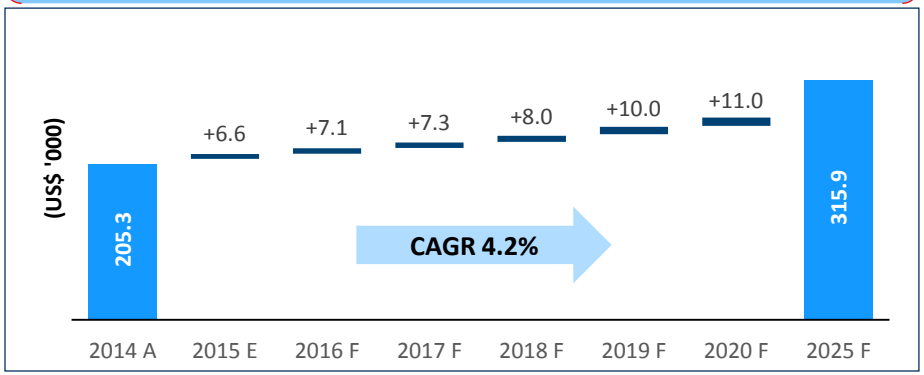

Figure 18: Global DWM Devices Market Absolute $ Opportunity (US$ '000) By Incisional Wound Type, 2014–2025

Source: *FMI, 2015*

Market Outlook

- Figures 17 and 18 highlight traumatic wounds segment revenue contribution and overall incremental opportunity from 2014 to 2025
  - *In 2014, traumatic wounds segment was valued at US$ 205.3 thousand and is estimated to account for US$ 211.9 thousand by the end of 2015, reflecting a Y-o-Y growth rate of 3.2%*
  - *The traumatic wounds segment is expected to account for US$ 315.9 thousand by 2025 at a CAGR of 4.2 % over the forecast period*
  - *This segment is expected to create incremental opportunity of US$ 110.6 thousand for the overall DWM market from 2014 to 2025*
  - *Absolute $ value for 2015 is estimated to be US$ 6.6 thousand.*

Global Digital Wound Measurement Devices Market By End-users

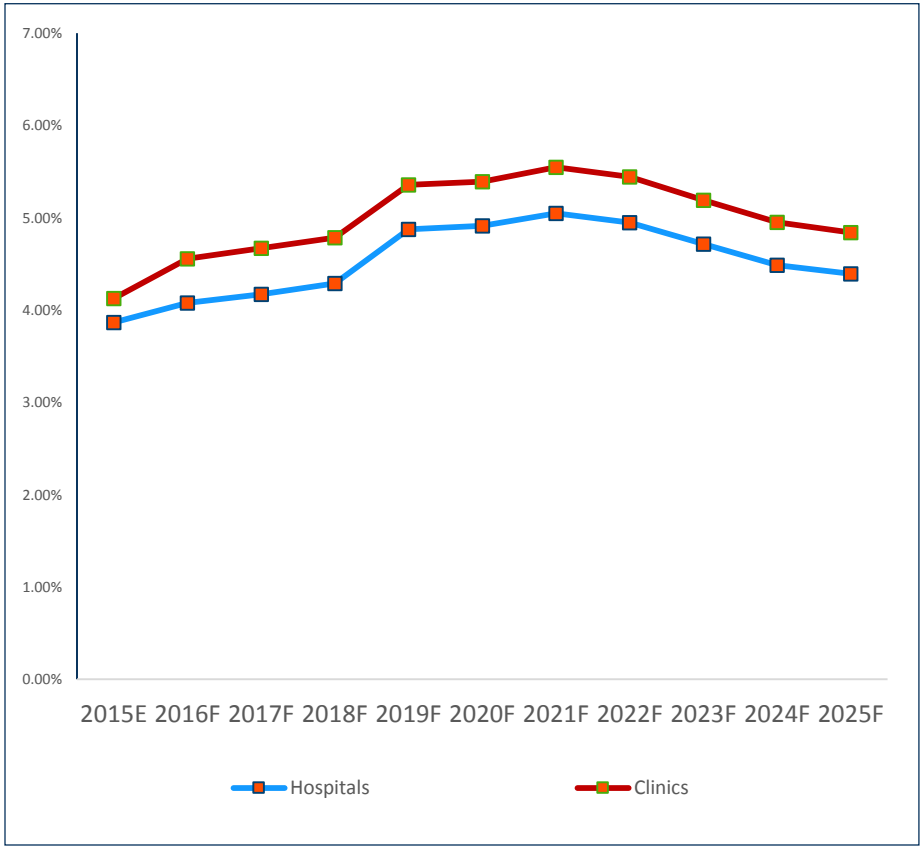

©2015 Future Market Insights, All Rights Reserved

Global Digital Wound Measurement Devices Market Y-o-Y Comparison By End-users

Digital wound measurement devices demand in hospitals is expected to be 2X higher than that in clinics by 2025 end

Figure 19: Global Digital Wound Measurement Devices Market By End-Users Y-o-Y Growth, 2014–2025 (%)

Source: *FMI, 2015*

Market Outlook

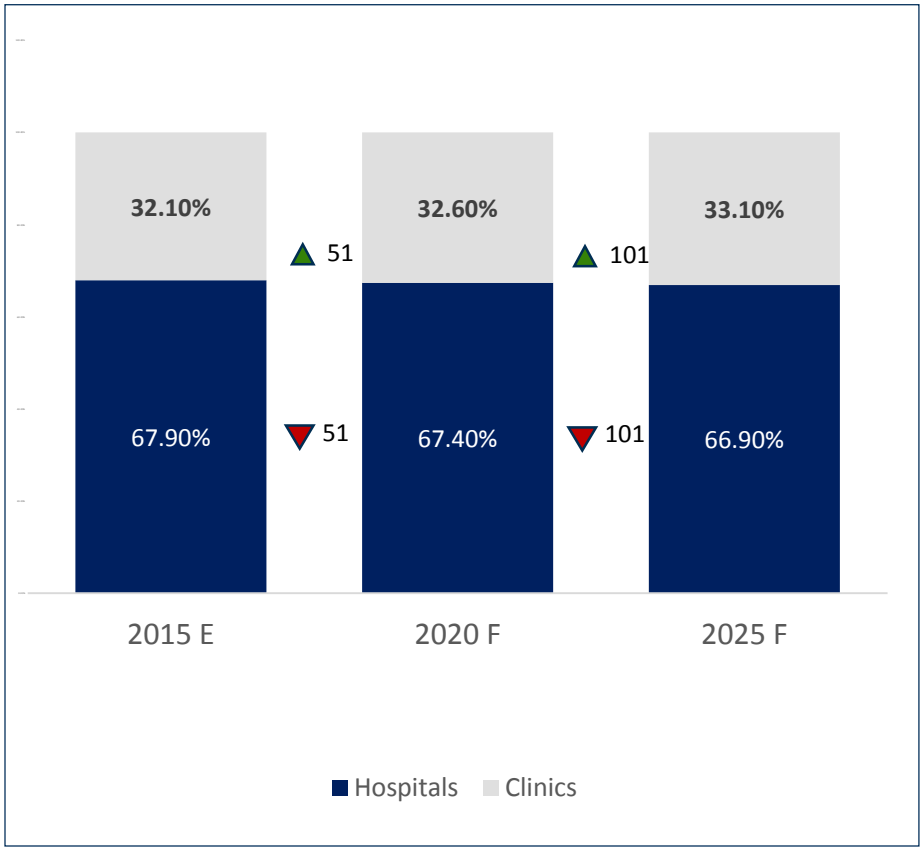

- Figure 19 highlights Y-o-Y growth of DWM devices by end-users, between 2015 and 2025
  - By end-users, DWM devices are most widely used in hospitals than clinics
    - *Demand for DWM devices is projected to increase from 4.0% in 2015 end to 4.4% by 2025 end*
  - Demand for DWM devices in clinics is comparatively lower to that of hospitals; however, is projected to exhibit an impressive growth rate over the forecast period
    - *Digital wound measurement devices market is expected to register a CAGR of 5.0% during the forecast period*

©2015 Future Market Insights, All Rights Reserved

Global Digital Wound Measurement Devices Market Revenue Proportion By End-users

Digital wound measurement devices end-use by hospitals is expected to account for 67.7% by 2020

Figure 20: Global DWM Devices Market Value Share By End-users, 2015–2025 (%)

Source: *FMI, 2015*

Market Outlook

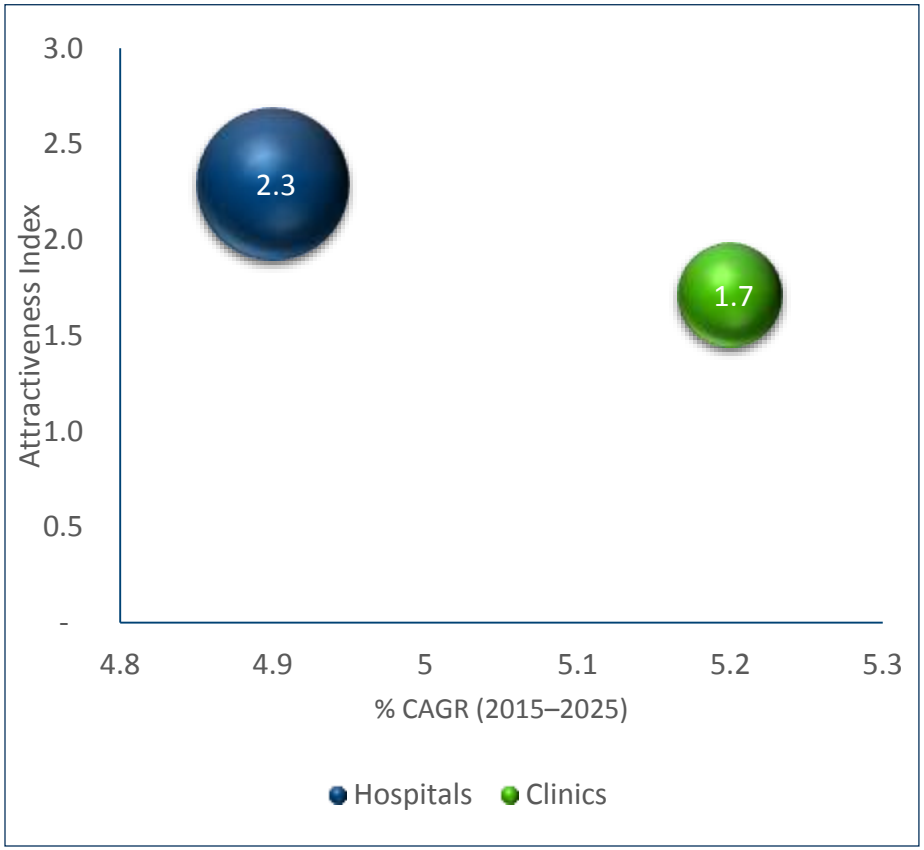

- Figure 20 highlights global DWM devices market value share by end-users during forecast period, 2015–2025
  - DWM devices usage in hospitals is estimated to account for 67.90% of the global DWM devices market value in 2014, while clinics is estimated to account for 32.10% the same year
  - DWM devices usage in hospitals is projected to remain dominant at 66.90% over the forecast period, but forecast to lose 101 BPS by 2020
  - Moreover, clinics is projected to gain 101 BPS during the forecast period
    - *Increasing patient traffic for faster and efficient treatment is the key factor driving adoption of new medical devices and technologies in clinics*

©2015 Future Market Insights, All Rights Reserved

Global Digital Wound Measurement Devices Market Attractiveness Index By End-user

Hospitals is the most attractive end-user segment, exhibiting an attractiveness index of 2.3, owing to increasing demand for DWM devices and advanced technologies by corporate hospitals currently

Figure 21: Global DWM Devices Market Value Attractiveness By End-users, 2015–2025

Source: *FMI, 2015*

Market Outlook

- Figure 21 presents attractiveness index for the global DWM devices market on the basis of end-users
  - Hospitals is the most attractive end-user segment, exhibiting an attractiveness index of 2.3
    - *Demand for DWM devices is high in corporate hospitals that are well-equipped with the latest medical technologies. These hospitals are witnessing healthy revenue growth over the past few years*
  - Clinics are projected to gain 90 BPS during the forecast period
    - *Increasing patient traffic for faster and efficient treatment is the key factor fuelling adoption of new medical devices and technologies in clinics globally*

Global DWM Devices Market Analysis by Hospitals End-User Segment

By 2025, hospitals segment is anticipated to witness an increase of 1.6X in value as compared to 2014

Figure 22: Global DWM Devices Market Value (US$ '000) & Y-o-Y Growth (%) By Hospitals End-user Segment, 2014–2025

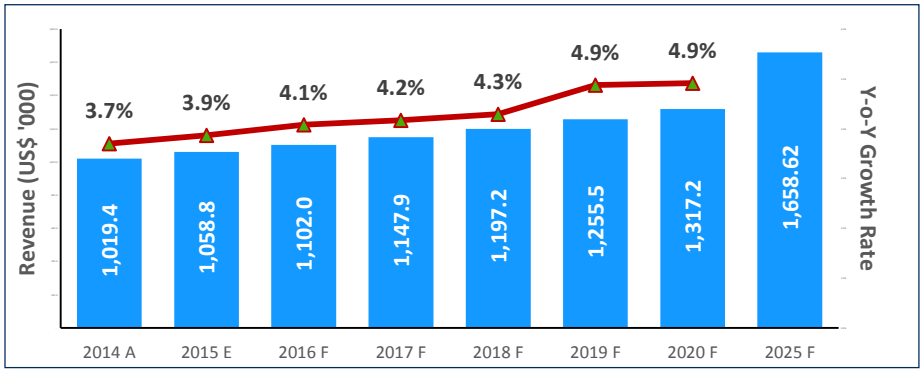

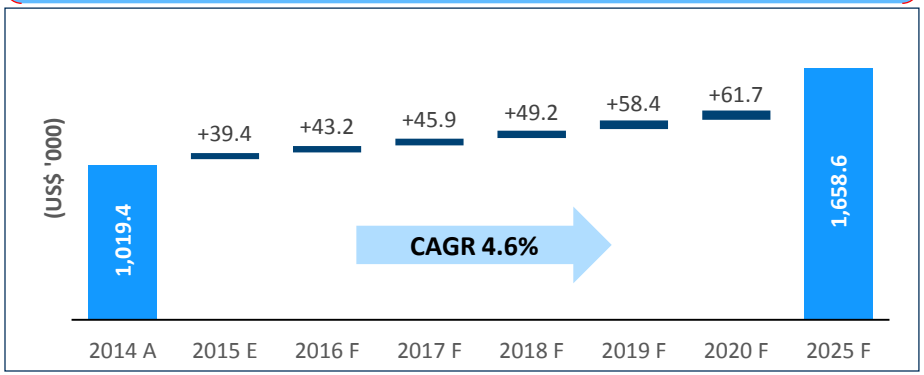

Figure 23: Global DWM Devices Market Absolute $ Opportunity (US$ '000) By Hospitals End-User Segment, 2014–2025

Source: *FMI, 2015*

Market Outlook

- Figures 22 and 23 highlight hospitals segment revenue contribution and overall incremental opportunity from 2014 to 2025
  - *DWM devices usage in hospitals accounted for US$ 1,058.8 thousand in terms of revenue, registering 3.7% annual growth in 2014. Hospitals end-user segment is projected to be valued at US$ 1,658.6 thousand by 2025, registering a CAGR of 4.6%, which is approximately 1.6X more as compared to 2014 value.*
  - *Hospitals end-use segment is anticipated to create incremental opportunity of US$ 639.2 thousand for the DWM devices market between 2014 and 2025*
  - *Absolute $ value for 2015 is estimated to be US$ 39.4 thousand.*

©2015 Future Market Insights, All Rights Reserved

Global DWM Devices Market Analysis by Clinics End-User Segment

By 2025, clinics segment is anticipated to witness an increase of 1.6X in value as compared to 2014

Figure 24: Global DWM Devices Market Value (US$ '000) & Y-o-Y Growth (%) By Clinics End-user Segment, 2014–2025

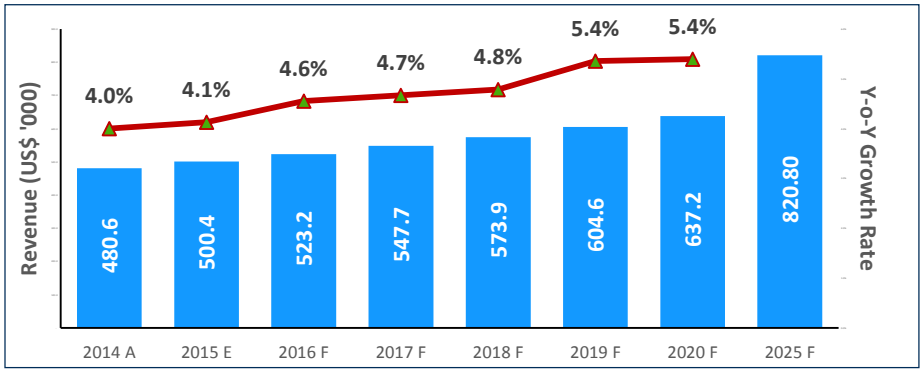

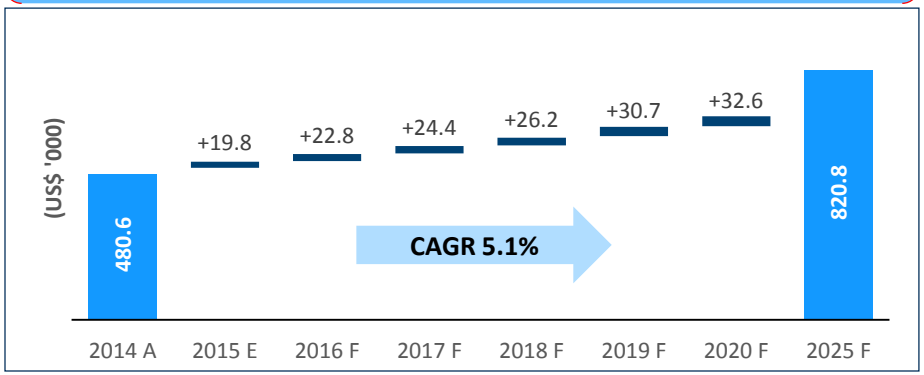

Figure 25: Global DWM Devices Market Absolute $ Opportunity (US$ '000) By Clinics End-user Segment, 2014–2025

Source: *FMI, 2015*

Market Outlook

- Figures 24 and 25 highlight clinics segment revenue contribution and overall incremental opportunity from 2014 to 2025
  - *In 2014, clinics segment was valued at US$ 480.6 thousand and is expected to account for US$ 500.4 thousand by the end of 2015, reflecting a Y-o-Y growth rate of 4.1%*
  - *The clinics segment is expected to account for US$ 820.8 thousand by 2025 at a CAGR of 5.1% over the forecast period*
  - *Hospitals segment is anticipated to create an incremental opportunity of US$ 340.1 thousand for the DWM devices market between 2014 and 2025*
  - *Absolute $ value for 2015 is estimated to be US$ 19.8 thousand.*

Global Digital Wound Measurement Devices Market, Regional Analysis

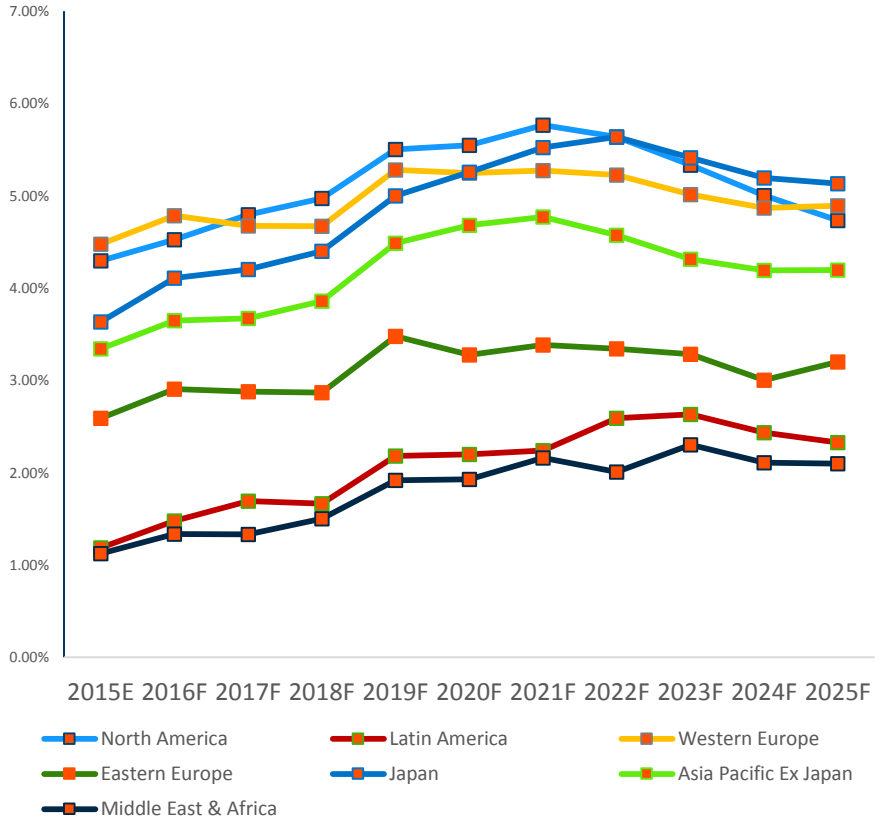

©2015 Future Market Insights, All Rights Reserved

Global Digital Wound Measurement Devices Market Y-o-Y Growth Rate By Region

In terms of revenue, North America is expected to dominate the global DWM devices market throughout the forecast period

Figure 26: Global Digital Wound Measurement Devices Y-o-Y Growth By Region, 2015–2025

Source: *FMI, 2015*

Market Outlook

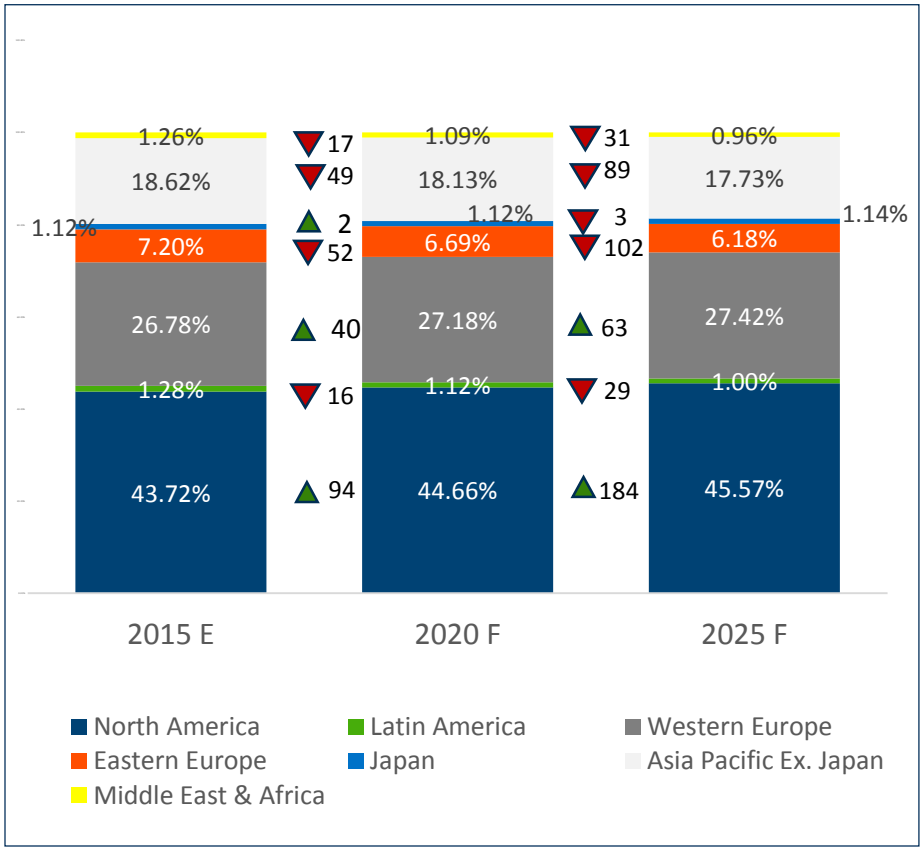

- Figure 26 highlights Y-o-Y growth of the DWM devices market by region
  - DWM devices are expected to witness significant demand in markets in North America, Europe, Asia Pacific and Japan
  - DWM market in Asia Pacific is expected to witness a decline in Y-o-Y growth rate from 5.2% in 2015 to 4.9% in 2018. However, growth rate is projected to increase to 5.8% in 2021.
    - *Low demand for DWM devices in India and China due to high prices of devices is proving a major restraint*
  - Various healthcare initiatives launched by governments of countries in North America and Europe are expected to boost demand for DWM devices in the near future.
    - *For instance, legally enforced schemes such as National Health Insurance (U.S.) is expected to be a driving factor for growth of the overall market*

Global Digital Wound Measurement Devices Market Value Proportion By Region

DWM devices market in North America is expected to witness highest CAGR of 5.2% throughout the forecast period

Figure 27: Global DWM Devices Market Value Share By Region, 2015–2025 (%)

Source: *FMI, 2015*

Market Outlook

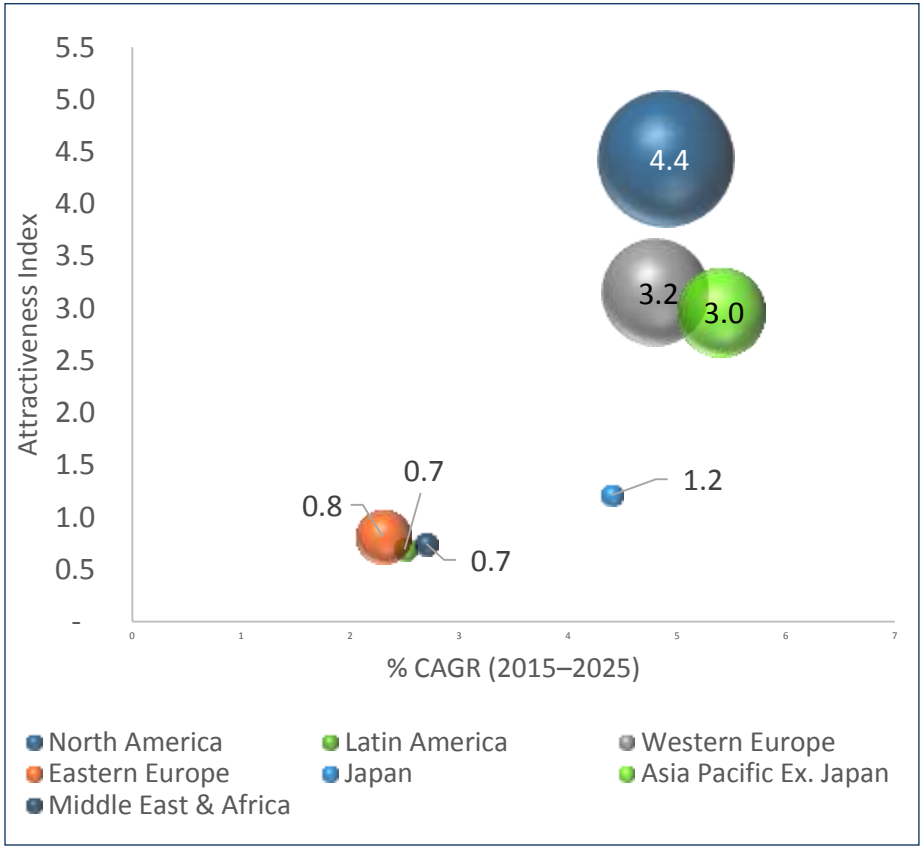

- Figure 27 highlights global DWM devices market value share by regions during forecast period, 2015–2025
  - Global DWM devices market accounted for US$ 1,500 thousand in 2014 and is projected to register a CAGR of 4.7% to reach US$ 2,479.4 thousand by 2025
  - The market in North America is estimated to account for US$ 681.8 thousand of the total DWM devices market by the end of 2015, gaining 184 BPS
  - The DWM devices market in Asia Pacific is projected to lose 89 BPS by the end of the forecast period

©2015 Future Market Insights, All Rights Reserved

Global Digital Wound Measurement Devices Market Attractiveness Index By Region

Epidemiological disease burden of chronic wounds in North America is a major factor driving increased demand for DWM devices

Figure 28: Global Digital Wound Measurement Devices Market Value Attractiveness by Region, 2015–2025

Source: *FMI, 2015*

Market Outlook

- Figure 28 presents attractiveness index for the global digital wound measurement devices market on the basis of regions
  - North America and Western Europe are expected to emerge the two most attractive markets for DWM devices, exhibiting attractiveness index of 4.4 and 3.2 respectively
    - *Epidemiological disease burden of chronic wounds in North America is a major factor driving increased demand for DWM devices*
  - Asia Pacific is likely to be the next dominant market with an attractiveness index of 3.0
    - This market is largely driven by demand for DWM devices in Australia and China

Market Outlook

- Figures 31 and 32 highlight the Latin America region revenue contribution and overall incremental opportunity from 2014 to 2025
  - *In 2014, Latin America region was valued at US$ 19.8 thousand and is estimated to account for US$ 20.0 thousand by the end of 2015, reflecting a Y-o-Y growth rate of 1.2%*
  - *The market in Latin America is expected to account for US$ 24.7 thousand by 2025 at a CAGR of 2.1% over the forecast period*
  - *This region is expected to create an incremental opportunity of US$ 4.9 thousand for the overall DWM devices market opportunity from 2014 to 2025*
  - *Absolute $ value for 2015 is estimated to be US$ 0.2 thousand.*

Source: *FMI, 2015*

Market Outlook

- Figures 35 and 36 highlight Eastern Europe market revenue contribution and overall incremental opportunity in the region between 2014 and 2025
  - *In 2014, Eastern Europe region was valued at US$ 109.5 thousand and is estimated to account for US$ 112.3 thousand by the end of 2015, reflecting a Y-o-Y growth rate of 2.6%*
  - *This region is expected to represent incremental opportunity of US$ 43.8 thousand for the overall DWM devices market opportunity from 2014 to 2025*
  - *Increase in wound incidence in Russia is driving demand for DWM devices in the region*
    - *For instance, around one million persons in Russia sustain open wound injuries each year, and this is expected to create a high potential market for DWM devices in this region*
  - *Absolute $ value for 2015 is estimated to be US$ 2.8 thousand.*

APEJ DWM Devices Market Analysis By Region

Demand for DWM devices is expected to rise significantly in APEJ, due to increasing geriatrics populations coupled with investment in healthcare sector, especially in Australia, China and India

Figure 39: APEJ DWM Devices Market Value Forecast (US$ '000) & Y-o-Y Growth (%) By Region, 2014–2025

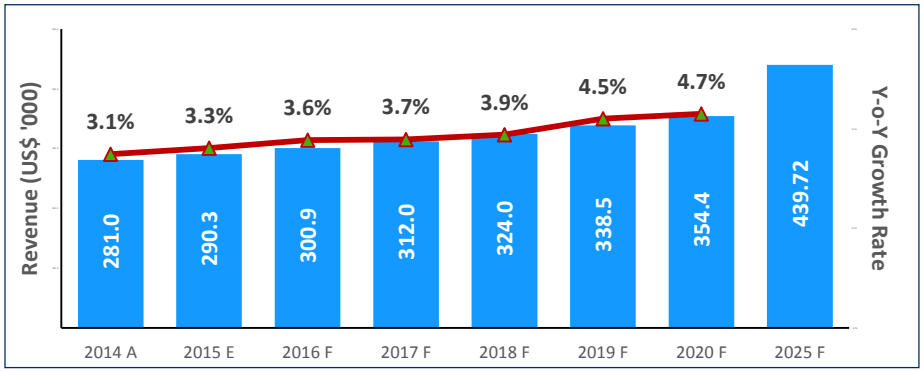

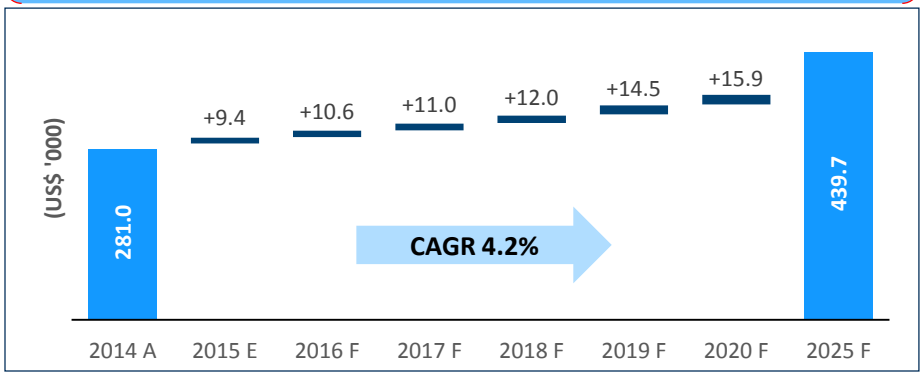

Figure 40: APEJ DWM Devices Market Absolute $ Opportunity By Region, 2014–2025

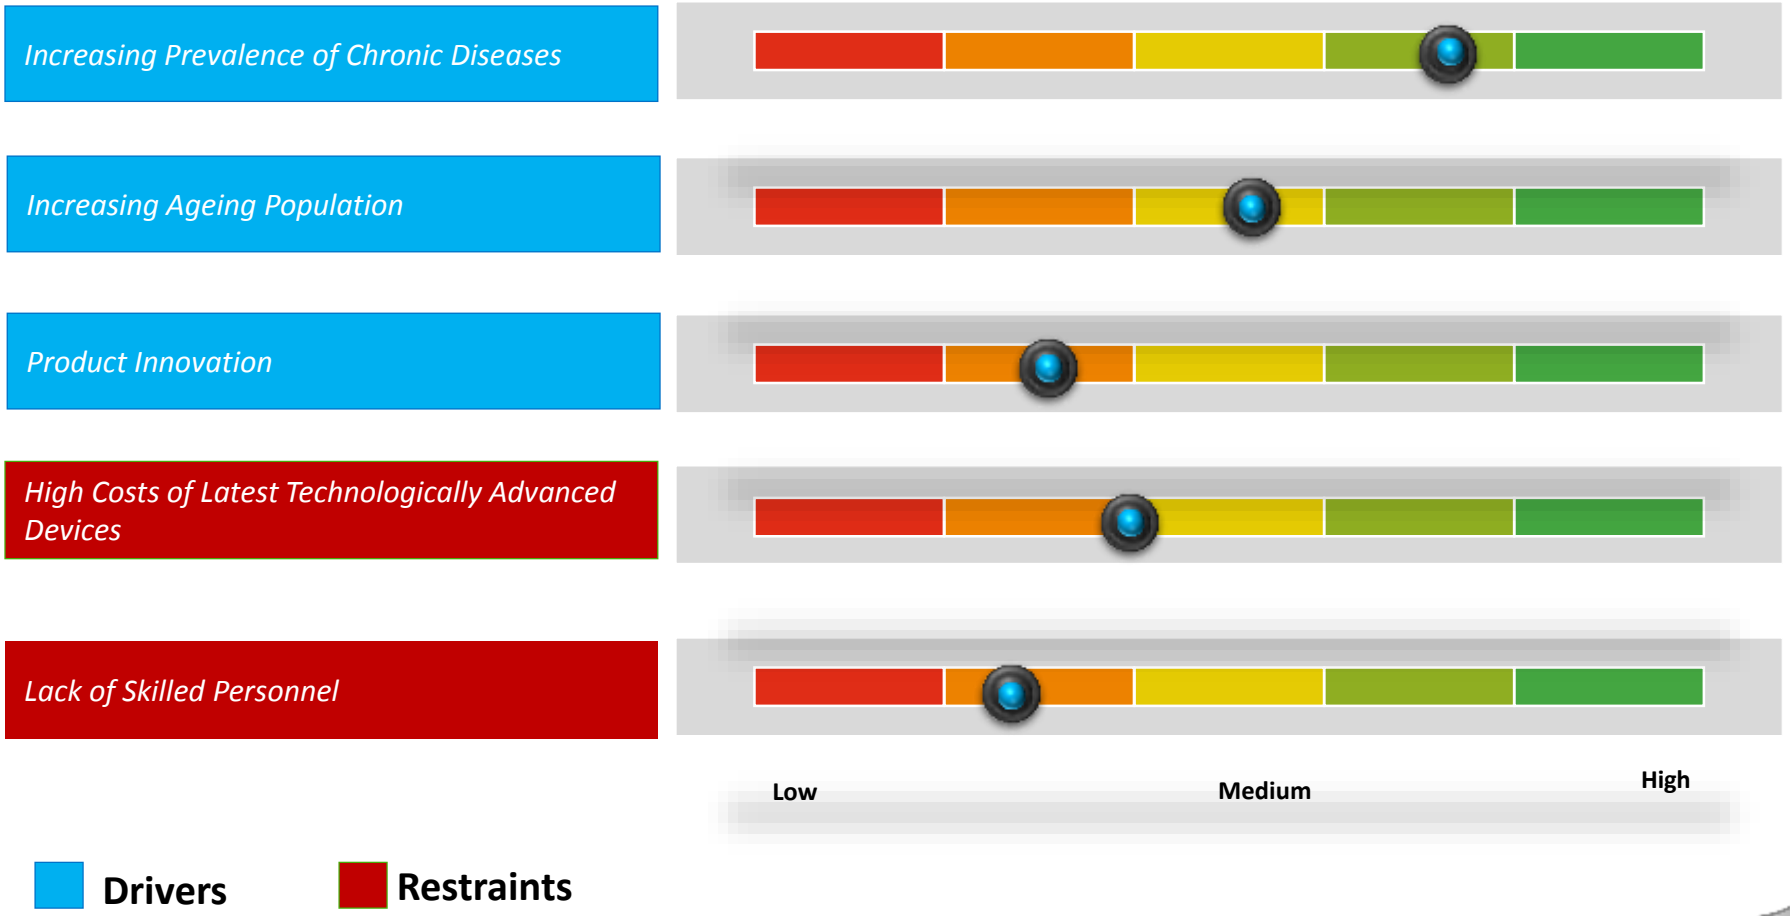

Source: *FMI, 2015*

Market Outlook

- Figures 39 and 40 highlight APEJ market revenue contribution and overall incremental opportunity from 2014 to 2025
  - *In 2014, APEJ revenue contribution was US$ 281.0 thousand and is estimated to account for US$ 290.3 thousand by the end of 2015, reflecting a Y-o-Y growth rate of 3.3%*
  - *This region is expected to represent incremental opportunity of US$ 158.7* thousand *to the overall DWM devices market from 2014 to 2025*
  - *DWM devices market in APEJ is largely driven by demand from Australia, followed by China*
    - *Chinese traditional wound medicine holds 50% share in the overall wound care market in China. Multinational companies are finding it difficult to expand market footprint in China. This is a major factor hampering growth of the overall DWM devices market in APEJ*
  - *Absolute $ value for 2015 is estimated to be US$ 9.4 thousand.*

Competitive Landscape

©2015 Future Market Insights, All Rights Reserved

Wound Zoom Inc. (1/2)

Company Details

Company Name	Wound Zoom Inc.
Established	2010
Headquartered	U.S.
Chairman / CEO / President	Tom Whelan (President)

Wound Zoom Inc. Segment Revenue Split, 2014 (%)

Overview

- The Wound Zoom Inc. is a Wisconsin-based medical devices company founded in 2010. It manufactures Wound Zoom Camera – a wound measurement camera that allows users to quickly, accurately and easily complete wound documentation.
- Company was founded with the mission to provide better tools for wound care clinicians
- Company supports quality research and education in order to empower the wound care community

Source: Company Website

©2015 Future Market Insights, All Rights Reserved

Company Profile – Wound Zoom Inc. (2/2)

Company emphasizes on the development of innovative products using advanced technologies in order to adhere to industry standards

PRODUCT OFFERING

❖ Products offered by the company include:

- **Wound Zoom Camera -** Digital, non-contact wound documentation camera system
- **Analysis Software –** Provides solutions for managing wound care database
- **Elixr -** A wound measurement tool driven by iCLR technology (provides area, circumference, width and height as well as automatic tissue analysis)

STRATEGY

- Wound Zoom Inc. invests substantially in research and development activities to develop innovative products in order to meet changing customer needs

KEY DEVELOPMENTS

- In early 2015, the company signed an agreement with Imago Care Ltd. to enhance its advanced wound care strategic marketing and technology consultancy
- In 2014, the company introduced digital wound measurement device namely Wound Zoom 2.0. This enabled to company to enhance its product portfolio and strengthen its global presence for the long term.

ARANZ Medical (1/2)

Company Details

Company Name	ARANZ Medical
Established	2005
Headquartered	New Zealand
Chairman / CEO / President	Bruce Davey (CEO)

ARANZ Medical Product Segment Split, 2014 (%)

Overview

- The company was founded by Ichibei Furukawa in 2005 and is an innovator of medical solutions, commercializing 3D scanning applications for wound care and orthotics/prosthetics. The company's founders came up with laser scanning device based on FastRB, which enables data sets consisting of myriad points to be inserted by Radial Basis Functions (RBFs).
- Company mainly operates primarily in the U.S., the U.K., Australia, Canada, Europe, Asia and New Zealand. Its clients include Smith and Nephew, the Department of Veterans Affairs and major U.S. healthcare providers.

Source: Company Website

©2015 Future Market Insights, All Rights Reserved

Company Profile – ARANZ Medical (2/2)

Innovation based on effective and efficient research and development is an important growth engine for ARANZ Medical

PRODUCT OFFERING

❖ **Silhouette –** Includes an imaging device that precisely and consistently measures area, depth and volume of wounds and healing progress, and software to store and manage wound informatics. It is an wound imaging, 3D measurement and documentation system, which provides accurate wound information.

STRATEGY

- ARANZ Medical invests substantially in research and development activities to develop innovative products to carter to evolving customer needs

KEY DEVELOPMENTS

- In 2014, ARANZ Medical received an R&D growth grant from Callaghan Innovation, which helps businesses in New Zealand succeed through technology
- In 2014, the company tied- up with Iron Bow Technologies to provide wound surveillance solutions to distribute its innovative wound surveillance system to the U.S. government customers
